0:00
thank you Mr chairman
0:02
um in 2012 six minors working in a bat
0:05
infested mine in southern China caught a
0:08
coronavirus had symptoms like covid-19
0:11
and three died but we didn't see a
0:14
worldwide pandemic we didn't see
0:16
millions of people die we didn't see
0:18
governments shut down their economies
0:20
take away Freedom such as speech freedom
0:23
of religion freedom basically to work a
0:26
job and support our families after that
0:29
samples of that virus were taken to the
0:31
Wuhan Institute of virology the only bio
0:33
safety level 4 lab in China
0:37
the Wuhan Institute of virology did gain
0:39
a function research on these samples and
0:42
other samples of coronaviruses in Autumn
0:45
of 2019 the SARS Cova 2 virus appeared
0:48
in Wuhan the closest known relative to
0:51
the virus extracted from the miners held
0:55
at the Wuhan Institute of virology
0:57

even early in the outbreak the virus was
1:00
well adapted to human to human
1:01
transmission Wuhan authorities worked a
1:04
silence dissenters and those Affiliated
1:07
in the Wuhan Institute of virology the
1:10
CCP authorities lobbied the who to
1:13
announce an international emergency in
1:15
blocked scientific investigative
1:18
investigations access into the Wuhan
1:21
Institute of virology here's what's
1:23
interesting Chinese military Major
1:26
General Chen Wei was put in charge of
1:29
containment of covid-19 he is the ccp's
1:34
top biological weapons expert and raises
1:38
questions about Chinese military
1:40
involvement at the Wuhan Institute of
1:42
virology
1:44
Dr Gary Dr Anderson I'll ask each of you
1:47
one at a time
1:48
why would they put the top biological
1:51
weapons expert in charge of containment
1:54
of a virus a virus that was very similar
1:58

to the one that a few miners caught in
2:01
2012 that by the way didn't turn into a
2:03
pandemic why would China put their top
2:05
biological weapons expert in charge
2:07
instead of just another virologist Dr
2:10
Gary
2:11
representing green I I don't have any
2:13
any idea I have no idea okay Dr Anderson
2:18
I I can't comment on that I think it's
2:20
important to realize I assume you're
2:22
referring to the virus rot G13
2:25
and what is very clear is that ritg13
2:28
cannot have led to sarskov 2.
2:31
these are very unrelated viruses well
2:34
well it's interesting though that that
2:36
you all wrote a paper uh claiming to
2:40
know exactly the origins of covid-19 but
2:43
China put their top biological weapons
2:46
expert in in charge of containment on
2:50
January 15 2021 the Department of State
2:52
released a fact sheet entitled activity
2:55
at the Wuhan Institute of virology
2:57

discussed three primary areas of concern
3:01
first one illnesses inside the Wuhan
3:04
Institute of virology the US government
3:06
believes several researchers inside the
3:10
lab became sick in the fall of 2019
3:13
before the CCP first reported cases of
3:16
covid-19 that was in the lab the CCP
3:20
prevented journalists investigators and
3:21
Global Health Global Health authorities
3:23
from accessing the lab including
3:25
interviewing the researchers that fell
3:28
sick in 2019 sounds like they were
3:30
concerned about so-called conspiracy
3:32
theories just like you were there was
3:34
also research at the the lab starting in
3:37
at least 2016
3:39
the Wuhan Institute of virology was
3:42
researching ratg 13 just as you
3:44
mentioned the back coronavirus with the
3:46
closest relationship to SARS kova II
3:49
96.2 percent similar the Wuhan Institute
3:53
of virology is published record of
3:55

dangerous gain of function research gain
3:58
a function like our government has
4:00
funded with grants through Eco health
4:02
I'm sure you're familiar there's secret
4:05
military activity at the lab the U.S
4:07
government determined
4:09
that the lab collaborate collaborated on
4:12
Publications and secret projects with
4:14
the CCP military since at least 2017
4:16
perhaps that's why they put their top
4:19
biological weapons expert in charge of
4:22
containment because they were very aware
4:24
of the type of research that was going
4:26
on at the lab where where people that
4:29
worked at the lab got sick with covid-19
4:31
first but you guys think this came from
4:34
nature
4:35
do you still believe it came from nature
4:38
Dr Gary Dr Anderson
4:41
yes I I do believe that the natural
4:43
origin via the wildlife trade is the
4:46
most likely origin based on all the
4:48

science all the data that we've analyzed

4:49

Dr Anderson

4:54

I do and I think it's important to you

4:56

mentioned the sick sick researchers here

4:59

in the recent report again the IC

5:01

continues to assess that this

5:03

information neither support nor refute

5:05

either hypothesis of the pandemic's

5:07

origin because the researcher's symptoms

5:09

could have been caused by a number of

5:11

diseases actually actually Dr Anderson

5:13

I'll reclaim my time the IC believes

5:16

that the origin of covid-19 is from the

5:20

lab most of the intelligence Community

5:22

believes that and they've stated so so

5:23

is the energy department and so do many

5:26

other doctors and researchers believe

5:28

that it came from the lab and from all

5:31

of this evidence it's very clear that

5:33

China also believed it came from the lab

5:36

but it's unfortunate that you all are

5:39

speaking the same approach China talking

5:41

points as some of our colleagues on our
5:45

committee and I think it's more
5:47

important to really recognize it
5:49

probably came from the lab I yield back
English (auto-generated)
