

0:00

them just two years later but we should because the people who told them are still effectively in charge here's one

0:07

it's from 2021 this is CDC director ruelle winsky telling us informing us

0:12

that anyone who takes the vax and then somehow manages to get infected but that would never happen but if it did happen

0:18

that person would not be able to spread the virus to anyone else we promise watch can you if you were to get

0:24

infection with and vaccinated could you give it to somebody else were you silently able to spread it those data

0:31

were not covered in the clinical trials but now data have emerged again that have demonstrated that even if you were

0:37

to get uh infected during um post vaccination that you can't give it to

0:43

anyone else why hasn't she been charged with a crime well she never will be uh

0:48

and of course just a few years later it turns out the whole thing was a disaster

0:53

of world historic proportions books will be written about this at some point when we can tell the truth about it a lot of

0:59

people were killed or permanently disabled by it how many is the question how many people were hurt by the vax how

1:06

many people were killed by the vax that was mandatory we just spoke to Brett Weinstein on this show  
Professor Brett

1:12

Weinstein he told us he's seen research up to 17 million people across the globe may have died from it  
watch I was

1:18

recently at a conference uh in Romania on the covid crisis and so there was a

1:24

lot of work trying to unpack what we actually understand and I saw a credible

1:30

estimate of something like 17 million deaths globally from this technology so

1:37

17 million deaths from the co vax well when you know when you scale up to

1:42

billions uh it's not hard to reach a number like that with a technology that's dangerous now to your  
deeper

1:51

question I think let's Steelman so just

1:56

for perspective I mean that's like the death toll of a global war yes absolutely it is this is a a a great

2:04

tragedy of History so that proportion 17 million globally now that's an estimate

2:10

and the interesting and most shocking fact actually is that we don't really know because no one seems to  
be keeping

2:17

track at least in this country which is amazing considering what our government keeps track of the B  
Administration

2:23

knows exactly how many transgender heart surgeons there are how many bisexual Simone airline pilots  
they keep track of

2:29

it with nazil likee Precision but how many people were killed or disabled by the co vaac they don't care so they're

2:36

not keeping track of those numbers so it falls to people who don't work for the US government and one of them is a man

2:42

called Steve kersch who was a MIT trained inventor by the way a longtime donor to the Democratic party not a

2:48

lifelong rightwing extremist or anything a businessman but he has now dedicated his time and his ample energy to

2:55

figuring out exactly what the covid vax did to this country and the world he's

3:01

the founder of the covid-19 early treatment fund Steve first joins us now Steve thanks so much for coming on thank

3:06

you Tucker it's great to be here so before um you tell us what you found and you've been working on this it seems to

3:13

me day and night for a couple of years tell us your background because it's it you don't have a background in public

3:19

health it it's sort of a weird life trajectory that you've had which I think makes a story more compelling how did

3:25

you get to where you are now to doing this well

3:30

I as a young uh kid I in uh I had a summer school probability course uh when

3:36

I was in high school and and that was just really um gamechanging for me I was

3:41

uh fascinated by math and just really excelled in math and I went to MIT I got

3:47

a couple of degrees uh from MIT left MIT started about seven different high-tech

3:53

companies a couple of billion dollar uh uh couple of them had billion dollar

3:58

market caps and then what happened is covid essentially closed my business and that

4:04

we couldn't go into work and so I was looking to uh do whatever I could uh to

4:11

make a difference so that that uh I could go back to work and everybody else could as well and so I I started looking

4:17

at early treatments and started the covid-19 early treatment fund raised about \$5 million and uh we we funded

4:25

research on on drugs like fluvoxamine which was featured on 60 Minutes

4:30

and then um uh there was of course this work on the vaccine in the background

4:35

and we were all very hopeful that uh the vaccine would be successful yes and so

4:41

it it it came out and the FDA said that they have tested it and it's um it's

4:48

totally safe and everybody should get it and uses this new novel technology and of course I'm a technologist so I'm

4:55

always looking for something that's new better uh technology

5:00

and uh so they said super safe everybody should get it and I said look even

5:05

though that uh I knew about early treatments and I knew that the fluvoxamine was effective in reducing

5:11

Long Haul covid and and if you got it early people didn't seem to uh suffer

5:18

from from covid even though I had that I said ah why don't I get an extra protection So I myself uh was vaccinated

5:26

in March of uh 2020 1 and I got two shots of madna and then about a month

5:35

later I started hearing horror stories from my friends I I heard from one

5:41

person who had three relatives who were perfectly healthy and all three of them

5:46

died a week after they got the vaccine and I said to her well I I said

5:53

that's impossible that's statistically like so unlikely that it could never happen if it was caused by the the

5:59

vaccine and she said yeah but they're dead and then a week

6:05

later uh the the our carpet cleaner comes uh at our door and he's wearing a

6:11

mask and I I give him a hard time I say hey don't you know if you take the vaccine you don't have to wear a mask

6:17

and he said well I wasn't able to take both shots and I said why not he said well after the first shot two minutes

6:23

after the first shot I he had a heart attack and he was he spent the night in

6:28

the hospital and he has never been the same since that time and so that was that was the

6:38

wakeup call for me when I saw it happening in my own personal Circle because I was believing the whole

6:43

narrative I was selling the whole narrative until this guy shows up at my door um to clean my carpet saying he had

6:51

a heart attack two minutes after he got the shot and he's never been the same and his wife had symptoms

6:57

too so that's what led me to start to look and see somebody's lying to me and I don't think it's my friends and so I

7:03

started looking at the vars data I looked at all sorts of data I looked at every piece of data I could lay my hands

7:09

on and it was all the same it was all showing that these shots are causing a

7:14

level of uh Adverse Events as well as

7:20

death morbidity and mortality uh beyond anything that's ever been seen before

7:25

wait can I ask you to can I ask you to pause right there so I mean you're describing pure intellectual inquiry

7:33

motivated by you know curiosity and concern which is great but you're also

7:38

doing this in a context and the context is the spring of 2021 where you are not

7:44

allowed to question the vaccine if you want to remain friends with people if you want to be considered a serious

7:49

person if you don't want to be trashed on Wikipedia as you have been and so you spend your whole life Gathering

7:55

accolades going to you know impressive schools making a ton of money being celebrated in the press and you must

8:01

know on some level cuz you're smart that if you start talking about this stuff all of that is over and you're going to

8:06

be a thought criminal and people are going to look at you sideways did you know that no I had I had no idea I

8:13

thought that if I told the truth and I let people know about the facts and the data that I had uncovered that people

8:21

would basically say oh you're right uh this looks like a big problem we need to

8:27

stop the shots and I told my wife after you know before I did this I said hey this will be over in like two weeks I

8:33

mean yeah it the data is so clear that this is going to be done in two

8:39

weeks and I'm uh we're we're we're still at it after all this time so so tell us

8:45

tell us what you found and what you have found and what your conclusions are well what I found was all the data was

8:52

consistent with this vaccine being the most dangerous vaccine of all time I mean there there are more reports on

8:59

this this vaccine in the VAR system which is the the vaccine Adverse Events Reporting System it's the official

9:04

system um for reporting Adverse Events for a vaccine it's set up by the US

9:09

government it's run by the US government and there were more reports for the

9:15

covid vaccine than for all vaccines in history

9:21

combined and not only that but we found out later that the this this fer system

9:27

which they set up to monitor for safety had triggered 770 different safety

9:34

signals now normally a vaccine only will trigger zero safety signals it' be

9:41

really unusual for a vaccine to trigger any safety signals in fact especially because the way they Define these safety

9:47

signals makes it almost impossible for a vaccine to trigger a safety signal but

9:53

this vaccine triggered 770 770 safety signals so what did these

9:59

CDC do about it they basically told no one the only reason that we even found

10:06

out about it is because someone issued a Freedom of Information Act request to

10:12

the CDC requesting could you show me the output of the analysis of the safety

10:18

signal analysis you're supposed to do and so they got back a spreadsheet showing 770 safety signals were

10:25

triggered that is mindblowing that is not a three alarm fire that is a

10:32

770 alarm fire these are things like sorry myocarditis these are things like

10:38

pulmonary embolism these are basically 770 unique symptom types that are

10:46

triggered in the ve system saying we have a problem here you need to

10:52

investigate this should have been a complete stopping condition for the CDC

10:57

the CDC should be warning people hey we got 770 safety signals never seen

11:03

anything like that before in history maybe we might have made a mistake on this vaccine but they said

11:10

nothing they didn't even let people know that there had been any safety signals

11:16

that were triggered and so there's no question that the CDC is a very corrupt

11:22

organization and that these people who are in charge here are burying all the

11:28

safety signals they will not engage with you they talk about saying hey we want

11:33

to stop misinformation but you know the way you stop misinformation you know by the way I

11:39

agree with them you know misinformation is a problem and misinformation kills the only thing that we disagree on is

11:47

who is telling that information now I think it's them and they think it's me but inless the two of us get together in

11:55

a dialogue we're not going to be able to figure that out and they seem to not

12:00

want to engage in dialogue with anybody that they call a misinformation

12:06

spreader so we never have resolution of this and in fact it's so easy for them

12:13

to stop the misinformation instantly all they have to do is invite us to a room I

12:20

don't care whether it's at the CDC or HHS in a room where we go and we say hey

12:26

let's query the vssd database which is the vaccine safety data link database

12:31

let's query the Medicare database and let's um query the Medicaid database

12:36

let's let's query those databases and see what results we get let's give it give us free access to query the data we

12:44

don't have to do the querying ourselves you can do the querying you just tell us the results we're not looking for any

12:49

personally identifiable information just statistics let's go give us free access

12:55

to the data so we can Surface the truth and if we're wrong we we'll back back

13:00

off no nothing can't can't get that can't get a dialogue with them they

13:06

won't give us access to the data but the DAT the data that we do have access to that we've been able to get it all shows

13:12

that the these vaccines are killing people and they're killing the very people that they were meant to protect

13:17

it's actually increasing your risk of death me I like on what grounds could they refuse to allow an

13:24

American citizen access to data that he pays for in the country that he owns

13:30

a a apparently they they're not required by law to respond they're required to

13:36

respond to the Freedom of Information Act requests now those Freedom of Information Act requests provide a very

13:44

narrow level of of data transparency we can only get reports that they've

13:49

produced we can't the under the the Foya laws you're not allowed to request stuff

13:57

that they don't already have so you they can run a um a s simple record count and

14:04

say how many records are you know uh how many people died or what have you but

14:10

you can't do uh you can't get them to create novel records uh under the

14:16

Freedom of Information Act request so you can't get them to run a query For You especially one that involves um say

14:24

uh uh you querying two two different databases because that would require work and work is not covered under Foy

14:32

so they have the option to opt out and whenever you try to request anything like that they always opt out or they

14:38

don't respond I mean like Aaron Siri's been trying to get lots of data from them for for a very long time and has

14:45

spent several years in litigation successfully and you know finally gets data but you know this should this

14:52

should not be like pulling teeth they should be like guys they they should be welcoming us they should be saying come

14:59

on in we want the truth to be exposed this shouldn't be an adversarial uh uh kind of relationship

15:07

this should be a very Cooperative relationship we're just scientists we're we're just trying to find out what the

15:12

data says and you know people like Brian hooker they were granted access to uh to

15:18

these databases to the vssd databases and when Brian hooker started finding a connection between Autism and vaccines

15:26

his access to the vssd database was revoked instantly and so this is the way

15:33

it works once you're on to something they revoke access now when there's no data transparency you have to be very

15:40

very suspicious of your government so look you know uh uh you know I have an

15:46

open invitation to the heads of the CDC and the FDA if you want you said that

15:52

misinformation is a problem you want to stop it all you have to do is invite us

15:58

in let us do the queries on your database and we'll see what the data says yeah and we'll make all of that

16:05

information public it's all about transparency of Public Health Information it shouldn't be kept private of course let us see the numbers that we

16:11

paid for and own as American citizens you disgusting dishonest bureaucrats I

16:17

agree but you don't have the chance to do that so what data sets are you looking at and what do they tell

16:23

you well so we I have um some data that

16:29

we were able to get um from the Medicare database and it shows very conclusively

16:34

that if you give uh the new Mao vaccine for example in uh March of 2021 it's a

16:41

flat line in fact it slopes downward if you give the covid vaccine to the same

16:47

group of people effectively it slopes upwards and it's not supposed what is it

16:55

that's sloping upwards the the deaths the death you kill people okay yeah yeah like you

17:02

know did it impact your mortality and so with the covid vaccine your

17:08

mortality increases every day since you got the shot for a while and so we we

17:14

we've seen that in the US data in the US Medicare data that's gold standard data

17:20

that's hard to dispute and you can't say it was oh it's just the timing because we can compare vaccine a with vaccine B

17:27

and vaccine a goes like like this and vaccine B the safer vaccine is a flat

17:32

line in fact it slopes downwards the other one slopes upwards and so it's comp it's obvious to anybody looking at

17:41

that data that the vaccine is increasing mortality and then we got this I was

17:47

contacted I got the data dump from New Zealand there was a guy Barry young who

17:53

is a database administrator for the New Zealand Ministry of Health essentially health New Zealand and he was very

18:01

concerned about what he was seeing in the database because people were getting the shots and dying and so he he

18:08

released the uh the datab the complete database of the database that he

18:14

controlled and he released it and I got a copy of the original database I then

18:20

uh opusc it to make sure that there was no personally identifiable information that was disclosed and I released the

18:27

the record level data the patient record level data that has never been disclosed

18:34

for any vaccine in history by any government in

18:40

the entire world so this is a this is an event this is an unprecedented event

18:47

never before in world history has anyone ever released this patient level record

18:55

level data showing when a person was vaccinated and showing when they died

19:01

and and it's for on it's on on a per person basis we don't need to disclose

19:06

any names we don't even need to disclose ages we just talk about age ranges and

19:12

you do this analysis on this data it's called a Time series cohort analysis it's the same

19:19

analysis that the UK does the UK office of national statistics does when they

19:25

try to analyze the vaccine in their country and show the vaccine is safe

19:30

they do what's called a Time series cohort analysis now I did the exactly

19:35

the same analysis technique on that data and what

19:41

it shows is very clear it shows that if whatever whatever is happening in the

19:47

background if the if the background is going uh upwards because you got it like

19:53

um dose three is given at a time when uh deaths are low and they're going high

20:00

and it and so you you naturally expect a slope up and we saw a slope up but the slope up went up like this instead of

20:08

this and for dose number four where the deaths are now falling because it's six

20:15

months later and it's the completely opposite seasonality deaths are now

20:20

falling but if you look at the time series cohort analysis deaths are rising

20:26

so in all cases is the deaths are exceeding what you would expect from

20:32

background there's no doubt about it I've talked to epidemiologists it's like

20:38

look it's very very CLE clear it's Crystal Clear we have record level data

20:44

it's the best data possible and it shows without any doubt whatsoever that the

20:51

vaccines are killing the very people that they were meant to protect so it's

20:57

confirmation of what we saw in the Medicare data now I can't have a

21:02

discussion with any epidemiologist in the world other than people who agree with me like Harvey r is's one of the

21:09

top epidemiologists in the world and he will say yeah there's there's no way you

21:15

can explain that and no epidemiologist in the world will come and and chat with

21:22

me about it and tell me how I got it wrong because this method is very ative

21:28

there's only one way to do the time series cohort analysis and what it shows

21:33

is very clear and anybody who claims that it doesn't show anything doesn't

21:39

really understand how to analyze data properly and so look I have an open invitation to any epidemiologist you

21:46

know let's have a discussion but nobody wants to talk about it in fact the epidemiologists that agree with me uh

21:53

tell me hey I can't chat with you and give my support because I will be be

21:58

fired from my job if I do that and so I can't afford to speak to you because I

22:04

need to provide for my family if I come and support you I'll be fired and like

22:12

there's one epidemiologist in in an area of the world where you know he can't get another job so he he's he's like you

22:19

know totally support what you're doing you're absolutely right but not I'm not really allowed to say a word because as

22:26

an epidemiologist will be fired it's the same thing happening for doctors doctors are not allowed to speak out if doctors

22:32

speak out they're going to lose their license to practice medicine they they could lose their job uh they'll be uh uh

22:40

their family won't talk family members won't talk to them anymore you know the whole thing I mean this is this is just

22:46

terrible that we can't we have people dying and we can't talk about it what what do you think based on the

22:54

numbers that you've seen and analyzed the death toll is from the co vac uh worldwide or uh how about

23:02

worldwide and the us if you have those yeah I mean worldwide it's over 13 uh

23:08

million people uh easily uh you know Denny Rancourt uh came up with 17 uh million

23:16

people and I don't disagree with that uh at all I think that's a that's a fair estimate and that doesn't surprise me at

23:22

all I know it's at least 13 million um so 17 million isn't uh a far stretch

23:28

from that and by the way you did an excellent interview with uh Brett Weinstein I I thought it was one of

23:35

Brett's uh finest interviews ever and and you did a just a spectacular job I

23:41

agree with everything that Brett said I mean I listened to that interview very

23:46

carefully everything that Brett said was spoton I mean it it does raise a number

23:54

a number of questions some of them even philosophical questions like how how can you how can World governments kill more

24:01

than 10 million people and leave some large undetermined number disabled for life and not say a word about it not

24:10

apologize not work to fix it not work to make the families whole I mean just

24:17

leave it by the side of the road like a corpse and keep marching I don't understand that how can that

24:23

happen um believe me I'm surprised as well you know I can't get an audience

24:30

with anybody in the United States Congress except for Senator Ron Johnson

24:36

like I can't have a dialogue they won't talk to me nobody wants to know they

24:42

don't want to know the truth it's like autism in this country you know autism's

24:47

been around for a very long time and we've known from this Statistics that

24:53

vaccines cause autism it's the leading cause of autism now now can we even get

24:59

a discussion about that may I may I ask you to pause that I mean the statement

25:05

you just made is verboten I mean no person who wanted to say work at the

25:11

Atlantic magazine or who takes the New York Times on a daily basis would would ever say something like that because you're not allowed to say that why do

25:18

you tell us why you say that say it's because it's true yeah

25:23

I've collected my own data just independently to look at at the

25:29

connection between vaccines and autism and it's amazing I had I had over uh

25:34

10,000 parents uh tell me about their kids and I said hey tell me about your kids tell me how many vaccines they've

25:39

gotten tell me if they have autism tell me if they have ADHD tell me you know just tell me about your kids tell me

25:45

about the medical conditions and tell me about how many shots they get and it's a

25:50

straight line the more shots you get the more likely you are to get autism and it's the same thing for ADHD it's a same

25:57

thing for panda pans it's the same thing for autoimmune diseases I mean the it is

26:03

basically the more shots you get the less healthy the kids are and this is

26:10

very clear from the statistics and then people say oh Steve you know you're your misinformation super spreader and your

26:18

followers don't believe in vaccines but there's no way that parents could have

26:24

coordinated their answers to this question to create a straight line for

26:32

all of these conditions that the more vaccines you get the greater your chance I don't care who my followers are

26:39

there's no way that you can game a statistical result like that so I know

26:45

just from my personal uh uh surveys that there's no way you could game something

26:51

like this that there is a connection but you know we have H lots of data that's

26:57

in the that is known by other researchers every um that there are lots of these papers the publishing that are

27:04

published showing the link between uh vaccines and autism I know one uh Doctor

27:09

Who's she he he um he had like a 150

27:14

autism cases and he said 44 of them happened relatively overnight meaning

27:20

that they happened within either the the child was was normal one day and then severely autistic the next day or it

27:27

happened over a one or two week period he said in for he had 44 cases where

27:33

where he had rapid onset autism and in every single one of the 44 cases it

27:40

happened within two weeks after a vaccine now so that is statistically

27:45

impossible if vaccines aren't causing autism so what one thing that's always and I I'm I'm willing to believe every

27:52

single thing you say um and watching the response to Bobby Kennedy's famous Rolling Stone or article almost 20 years

27:58

ago convinced me they were hiding something because the hysteria was just overwhelming but what's so interesting

28:05

is there are a couple of big autism advocacy groups well there's one big one and they quote don't take a position on

28:13

this and how could a group that supposedly Advocates on behalf of

28:19

children with autism and funds research to prevent autism or to to to alleviate

28:25

the symptoms of autism how could they ignore this well they shouldn't you know but

28:31

they do and the reason that they do is because they'll be uh uh they're worried

28:37

about being uh essentially uh offending their donors right and what

28:45

they want is they want to have the widest possible donors and uh donor base and I you know I think that's the reason

28:51

and it's like you know for example there's a guy Richard Fry he's one of the top autism research in the world and

28:59

he's admitted that hey all of us top autism researchers know that vaccines cause

29:05

autism but we're just not allowed to talk about it and so Richard Fry will

29:12

never publicly talk about that vaccine's cause autism because if he did his

29:18

funding would go away and so it's a matter of self-preservation he basically has to

29:25

remain silent and he can do his work to combat autism he just isn't allowed to

29:30

tell the world that vaccines cause autism but you know he makes a decision

29:37

and his decision is based on a you know sort of a risk benefit if I if I tell

29:42

the world that if he he says you know the reasoning is if I tell the world that vaccines cause autism basically I'm

29:50

kaput as a researcher I will never get any dollars of funding again and I can't

29:55

help my patients they'll take my license away they'll take my funding away

30:00

they'll destroy me I will not be able to contribute anymore to figure out what

30:06

the Cure is and so he basically remains silent for self-preservation reasons now

30:14

if he and all of his peers were to get together and in unison say hey vaccines

30:21

cause autism we're the 20 top researchers in the world vaccines cause autism we need to stop

30:27

this we need to let people know of the connection then that could that could

30:34

possibly change everything or it could result in those 20 researchers essentially being disenfranchised being

30:42

kicked out of their jobs being um you know not being able to help autistic

30:47

kids anymore and so it's a risk for them and so they don't play the risk and the

30:54

problem is that we have so many kids today you know it's the the

31:00

CDC says it's 1 in 35 I think it's much higher than that um because I've talked to to friends and just pulled my friends

31:07

I said hey do you have an autistic kid in in your household and it's like uh one in four of my friends have an

31:12

autistic kid in their household and so these numbers are

31:18

staggering and the way to stop it is is to to realize that the whole vaccination

31:25

program the whole childhood vaccination program you're better off as a child not getting any vaccines at all than getting

31:34

the whole uh uh childhood schedule and there have been papers on this that show that kids who got zero shots and and

31:42

they compare kids that are completely unvaccinated with kids who are fully vaccinated there's no

31:48

comparison that the kids who are completely unvaccinated are far healthier than their vaccinated peers

31:55

and you know there's a clinic in in the United States I'm not going to tell you where because otherwise they'll be shut

32:02

down almost instantly um but this Clinic has been basically not giving kids

32:09

vaccines and and explaining to parents the risk benefit of vaccines and the parents are deciding not to vaccinate

32:15

their kids there's not been a single unvaccinated kid in their practice in 25

32:22

years and this is tens of thousands of kids in 25 years not a single case of

32:28

autism when they withhold the vaccines from the kids and the kids are healthier and so there are all of these studies in

32:35

the peer- reviewed literature comparing a completely unvaccinated kids with completely vaccinated kids and they're

32:40

all in favor of the unvaccinated kids not a single exception and so they tried

32:47

to get a the NIH to go and do a study to be the definitive study comparing fully

32:54

unvaccinated kids with fully vaccinated kids but they couldn't even get the bill

32:59

out of committee in Congress they had nine co-sponsors it was in in uh 2009

33:06

they had nine co-sponsors including I think um uh uh I I think Rand Paul was a

33:12

was a co-sponsor of this they couldn't get it was killed in committee they couldn't even ask the NIH Force the NIH

33:20

to do a study between the completely unvaccinated and and the fully vaccinated so this has been going on for

33:27

a long time that they've been able to hide this stuff they've been able to hide the connection between vaccines and

33:32

autism they've been able to to hide the connection between vaccines and all of these diseases that kids have the you

33:39

know the ADHD the peanut allergies the food allergies the um any kind of

33:44

autoimmune diseases I mean these things are are totally linked with the vaccines

33:50

and You' see it in the data and of course the CDC knows this like the CDC had a study it was done in in early 2000

33:59

and uh William Thompson was one of the authors of that study and he admitted

34:04

that the CDC basically told him to delete all data that linked vaccines and

34:11

autism from his study so he can report that there's no link between vaccines and autism He was ordered to destroy

34:19

data linking vaccines and autism and when they tried to get him to testify in

34:24

Congress that he was ordered by his CDC superiors to destroy this

34:29

data uh uh Bill posy Congressman Bill posy was was basically told look you're

34:35

not going to have this hearing in Congress we're not going to let uh Bill Thompson testify you're not going to

34:41

have your hearing and if you insist on it we're going to take away all your committee chairmanships so it's

34:46

basically they don't want to see any of this stuff happening they don't want to be exposed in Congress Congress is

34:53

complicit uh in this it certainly is it's horrible so let me uh I've got two

34:58

more questions for you um one before I forget if people have made it this far into the interview and want to know more

35:04

about your research the data you've uncovered where will they find that sure

35:09

it's uh Steve uh it's it's uh kersch substack uh.com Kirch substack Doc and

35:18

they can go there you can also go to my Twitter feed and then it'll link you to the uh uh sorry the the X uh my ex uh

35:28

profile St kersch St ksch on uh on X and you can also go

35:35

there as well and I've written about 15 probably over 1500 articles on uh

35:42

vaccines and uh covid mitigations and so forth and there's a lot of material

35:48

there for people to go through and you know I've I've accumulated uh you know somewhere around a million followers

35:55

worldwide on the social media platform forms and substack and so forth it it's

36:00

it's and this leads exactly to my last question which is it it's just an amazing life Arc that you've had you

36:05

said that uh not even three years ago you you you got vaccinated yourself you were not afraid of vaccines you were

36:12

kind of hopeful that they would work and now you've produced this enormous Corpus of research um showing just the opposite

36:20

what has happened to your life you a minute ago talked about researchers you

36:27

know who won't go public for fear of having their lives destroyed you've moved in the opposite direction at high

36:32

speed what's happened to your life since you started doing this um we'd lost probably

36:41

95% of the friends who used to associate with uh with us normally uh they won't

36:50

talk to us anymore it's basically we don't want to talk to you you're an evil person personal friends yeah yeah you know it's the same

36:57

thing with the scientific Advisory Board uh uh members they said um I said look hey if I'm wrong you know please tell me

37:04

please engage with me and tell me where I got it wrong and they said no you're an evil person we don't want to talk to you you're wrong and we don't want to

37:12

talk to you you're you're you're a bad person you know I I had a um my wife and

37:17

I were given a national caring award because of our work with uh philanthropies we're we're a big

37:25

philanthropist and so we received a national carrying award in Washington DC in a big ceremony and was it the award

37:31

was personally presented by Hillary Clinton uh in my case uh they had

37:37

Senator Clinton uh give the award to us in DC and I used to have that on my

37:42

Wikipedia profile now as soon as I came out and I said that the the data shows

37:49

that the vaccines are not safe my national caring award was removed from

37:55

my Wikipedia profile you know and it it's just an objective um uh showing how wow people

38:04

are basically trying to position you and to recast you as now this evil person

38:11

who spreads misinformation when all you're doing is telling the truth so we

38:16

lost about 95% of our friends and you know but but I look at it and I say look

38:22

you know I I may have lost um 100 or 200 friends but I now have a million new

38:31

friends and I get stopped at airport saying hey are you Steve kersch and can I have a selfie with you you know and so

38:39

I've gone from not being recognized in public to going anywhere in the world

38:45

and people will stop me and say hey can I take a selfie with you and so that

38:51

it's a pretty dramatic shift I went from being a top high-tech between I used to

38:58

be a high-tech executive respected high-tech executive and now I can't talk

39:03

to my high-tech peers they think I'm nuts and and now you do a Google search

39:09

uh and you you search for misinformation super spreader I'm the top hit you know

39:15

I never expected in my life that I would be the the one thing that it would be

39:21

different about me that the one unique thing that I would be the best in the world at that I would be the number one

39:28

hit at Google on is misinformation super spreader that is like you know at least

39:34

but you know I'm grateful at least I found my calling at least I'm good at something and and it is great to be

39:43

nationally recognized by Google as the top hit when you type in misinformation

39:48

super spreader but you know all I'm doing is I'm telling the truth yes I've noticed and it is so hard that you know

39:56

it's just like Peter hotz was offered millions of dollars to have a civil

40:03

debate with Bobby Kennedy and hotz turned it down who

40:09

would turn down a million dollars just to have a discussion with someone Bobby

40:15

Kennedy's been trying to get a debate on autism for 20 years for 20 years he's

40:21

been trying to get somebody in the medical community to have a debate with in 20 years he's not had a single debate

40:29

with anyone in the medical community on autism and it's the same thing with

40:35

Peter Hotes everyone who is a classed as a

40:40

misinformation spreader or super spreader they all want to have a civil

40:46

debate and a dialogue to say hey this is what the data shows if we got it wrong

40:51

please explain it to us but there is nobody who is prominent on the pro

40:58

vaccine narrative side who will agree to

41:04

debate anyone on our side yes so everybody challenging The Narrative says

41:10

please let's have a civil discussion and the people on the other side are saying no we will not have a discussion with

41:18

you we will not engage with you let's duke it out in the medical literature

41:23

and that is a copout because we have been duking it out in the

41:28

medical literature on autism for 20 years there are more papers showing that

41:34

vaccines cause autism then there are papers showing vaccines don't cause autism now if we haven't resolved that

41:41

in 20 years in the medical literature why do we think it's suddenly going to

41:46

happen for autism or for the covid vaccines that's right it's not going to happen the only way it's going to happen

41:53

is with civil dialogue where we're allowed to say hey here's the evidence explain it here's the evidence

41:59

on our side let's have the dialogue but the dialogue has been turned into

42:05

censorship and Bobby Kennedy made a brilliant observation he says that the history has shown that anyone

42:14

who uses censorship as a weapon they're always on the wrong side they're committing a crime by definition that's

42:21

exactly right yeah well I think um I have concluded that you're an amazing person um and that you're telling the

42:27

truth and I'm grateful that you spent this time with us and I hope good evening and welcome to Tucker Carlson tonight here is the main thing you need

42:34

to know about Joe Biden he is 82 80 years old rather he was born in 1942 in

42:40

the first half of the last century the year Biden was born only 36% of American

42:46

households had a telephone nearly half of them did not have indoor plumbing Joe Biden turned 80 last November this fall

42:52

he will be 81 if Biden were to serve a second fullterm as president president he would be 86 years old in other words

42:58

4 years from 90 these are not trivial facts about Joe Biden these are the

43:04

central facts of Joe Biden's life Joe Biden's age defines him and all of us

43:09

that's true for every person age is just a number you will hear people say but they are lying to themselves age is more

43:15

than a number age is an expression of the core biological reality of human existence which is that at some point it

43:21

comes to a close age is the way that we chart our progression from birth to death as we pass from this world as

43:27

billions before us have and are replaced by others that used to be called the cycle of life no one has ever changed it

43:34

no one ever will so our choice is between accepting a reality we cannot alter or denying that reality even

43:41

exists the Democratic party has chosen the latter tomorrow is March 1st that

43:47

means a year from today we will be in the middle of presidential primary season Joe Biden has given every

43:52

indication that he plans to participate in that and that his party is firmly behind him the DNC has already changed

43:59

the primary calendar to make South Carolina which is a machine state where the outcome can easily be scripted the

44:04

very first contest and that was not an accident it was done it was changed to help Joe Biden win Biden says he's

44:12

strongly considering running again Biden's wife of course says she very much hopes he will run and most

44:17

tellingly of all no mainstream Democrat has announced a run against him so as of

44:23

tonight Joe Biden is in the race for the Democratic nomination and as of tonight he will get the nomination and that's just amazing if

44:30

you think about it Joe Biden would be 82 years old on inauguration day that is 8

44:35

years older than the average life expectancy for men in this country so virtually everyone in his high school

44:41

class will be gone by then but Joe Biden will be just beginning his second term as president of the United States would

44:48

that be healthy for America would it be healthy for Joe Biden of course not it's awful 82-year-old men should not be

44:56

running countries they are not strong enough mentally or physically everybody knows that very much including any

45:01

82-year-old man you ask the people around Joe Biden certainly know that how could they not know that they watch him

45:09

and you do too here's Joe Biden in Warsaw Poland just last week the

45:14

questions we faced were as simple as they were profound would we

45:19

respond or would we look the other way would we be strong or would we be weak

45:26

would be you we would would we the all of our allies would be United or

45:31

divided should we play Clips like that a million times for you over the past few years we could play a million more

45:37

because Joe Biden talks like that every day at this point it's how he talks Joe Biden is losing his ability to speak

45:44

that's not a secret it's not something you learn from our confidential sources and are bringing to you for the first time tonight exclusively that is obvious

45:51

to the entire world and you'll probably sound like that too if you make it to Joe Biden's age we will also it's not

45:58

weird it's natural it's not an attack on Joe Biden hardly it's an observation but

46:05

because it's natural we have been commanded to ignore it Don Lan got

46:10

suspended from his show at CNN recently for suggesting that a presidential candidate in her 50s was quote Pastor

46:16

Prime and that's odd really as a factual matter what Don Lem man said is true

46:21

people in their 50s are literally certainly physically past their Prime that's a fact take it from someone who's

46:26

53 so why was that such a controversial point of all the demented things that

46:32

Don Lem man has said over the years noticing somebody's age is what blows up his career yes because that simple

46:41

commonplace observation people weaken with age points to a power that will

46:46

forever remain Beyond human authority which is the power to control time no

46:52

matter how rich we are we cannot prevent ourselves from getting older we can buy Botox and hair plugs and

46:58

facelifts Joe Biden has bought all of that but in the end we degrade anyway because we are not God accepting this

47:06

fact that we are not God working within the pre-ordained limits of nature is the key to balance and happiness in this

47:14

human life ignoring that fact leads to insanity or in the case of modern

47:19

America it leads to the trans agenda and climate theology if you asked a 100

47:24

honest people to name the things that human beings cannot control most would list biological sex and the weather you

47:31

can't decide whether you're a boy or a girl you are what you are born sorry and nobody try as we might  
can make a sunny

47:38

day you don't manufacture it you receive it a sunny day either happens or it doesn't it's not up to you at  
best we

47:45

can try to predict the weather we cannot determine the weather since the dawn of time that has been  
so obvious that

47:51

almost nobody's ever mentioned it but saying it out loud is now heresy and and that's because our  
leadership class is

47:57

at open war with nature nature is the final limit to their power and so they hate it they tell us they're in  
charge

48:03

of human biology even of DNA trans women are women they Screech meet our lady Admiral they brag  
about how they now

48:10

control the weather too hot for you hold on we'll change that with the green New Deal and then they  
tell us of course

48:15

that age no longer matters Joe Biden may live forever we've got AI now it's all a ridiculous fantasy they  
have no such

48:22

power they can't even keep the electrical grid running in the state of California and on some level they  
know that they

48:28

know how limited they are which is why they become so hysterical in the face of

48:33

physical reality because it's a reminder of their limits do you remember this fall when that NBC reporter  
a woman called Dasha

48:40

Burns dared to point out that John fedman stroke had damaged him well of course it had damaged him everyone could

48:45

see it had damaged him but to fetterman's wife and the rest of the democratic establishment and the rest of

48:51

the press Corps saying something like that out loud was more offensive than any obscenity

48:56

here's an outrage Mrs fedman what a disservice that she did to

49:01

not only my husband but to anyone facing a disability and working through it and

49:07

I don't know how there were not consequences right I mean there are consequences for folks in these

49:12

positions who are any of the isms I mean she was ableist well she's an ableist how

49:19

Gizelle fedman because someone had correctly pointed out that her husband was no longer able because he had a

49:25

stroke in other words reality intruded on Mrs fed's fantasy and therefore

49:31

reality itself had to be shouted down and destroyed you're seeing an awful lot of

49:37

this attitude that exact attitude recently from the people in charge it's not a healthy sign wise leaders

49:43

recognize the limits the inherent limits of their power they know that they're not in control of much actually because

49:50

no one is you can decide what to have for breakfast that's up to you but you cannot decide to become a woman you

49:57

can't choose to live to 100 you can't even choose to think clearly at 80 none of that is your choice even if you're

50:04

the president life unfortunately is a sexually transmitted invariably fatal

50:09

condition that's not a bad thing it's just true and when you deny it bad

50:15

things happen and they are Candace Owens host the cace Owens podcast she joins us

50:21

now I have to say Candace Owens the one thing I will never attack Joe Biden for his age because it's the one thing he

50:26

doesn't control and I have absolute sympathy for him I hope to make it to that age so this is not an attack on him

50:33

for being old I'm just amazed that no one around him feels empowered enough to

50:40

point out I'm sorry you're too old to be president why is that the one verboten thing why is that the one thing no one can

50:47

say yeah you know I do feel some sympathy for Joe Biden because obviously he is mentally in incapacitated but it

50:53

does make you want to question Jill Biden and people like jelle fedman who understand exactly what their husbands

50:58

are going through understand that they're being mocked on the world stage and understand that they are struggling uh struggling even to form coherent

51:04

sentences and yet they sit there and they applaud and they think we're just going to keep hiding this from the public all on their quest uh for power

51:10

and that's really what this comes down to look we can call these people incompetent they are but does incompetency matter no because they're

51:17

here to serve the party this is all Democrats care about you are here to serve the party and actually if you are incompetent that's even better right

51:24

because these are puppets these people are on strings these people are to do what they're told and not to think expressly actually they are told not to

51:31

think individually think only about the party do what we tell you to do and what we want you to do is to further

51:37

disintegrate these communities is to further denigrate these communities because what we are after for as the party initiative is full omnipotence and

51:45

what they need to create is a new system of slavery this is why I call it the ultimate thing that they are after is

51:50

Neo slavery they want to make sure that no individual holds power in this country and so what what you're seeing

51:55

is something that's very evil you are calling out something correctly and saying that their final war is a war

52:01

against nature it's a war against sanity it's it makes us question our sanity you would never think that we would be

52:06

having these debates that we're having today that people would be telling you that it's a wrong thing to say that an 86-year-old is old right so suddenly

52:13

we're being attacked for this everything is given an ism and the reason is just as you correctly pointed out is because

52:19

it is the final war and they need to make sure that they control even language well I think language is the

52:25

key because they've cowed the population even smart people who know better into

52:30

not saying the obvious things their fear is that people will say the obvious things you're too old to be president

52:36

your trans Admiral is a dude putting incompetent people in the cockpits of commercial airliners or having them

52:44

perform heart surgery is insane you're insane like none of this is real you can't allow this to happen and those are

52:51

the very things that no one is willing to say I don't know why

52:56

I'm certainly not one of those people I don't struggle to say exactly what needs to be said and this is exactly why because if they win if they win this

53:02

battle there is nothing left right there is nothing left and so I encourage people I say no you need to say the

53:08

thing that you know is true because the problem that we're having right now is too many conservatives are acting like cowards right they're saying we need to

53:14

be nicer it's okay this is how they have gained so much territory this is how we are fighting them in the school systems

53:20

how we're fighting them in the classrooms how we are fighting them to Simply acknowledge that women can never men and men can never be women these are

53:27

these are insane arguments but they're able to happen because good people sit by and say absolutely nothing while they

53:33

run a muck and and so I also want to say this and it's it's very important to point out the Democrats used to be quiet

53:38

about their corruption right years ago they were quiet about their corruption now they're corrupt openly and they're mocking you and what they're really

53:44

asking you is and what are you going to do about it so what we knew Federman was mentally incapacitated and we still

53:49

allowed him to make it all the way to the Senate and what are you going to do about it so what we know that Joe Biden

53:54

can't can barely walk we can see the early signs of dementia and what are you going to do about it it's a very fair

54:00

question I I'd ask the same to everybody out there watching this program what are you going to do about it why don't you

54:05

start saying the truth and Having the courage to say it boldly can I just ask you one one last question as a as a wife

54:10

and mother which you are so here you have Dr Jill and Jazelle fedman both

54:16

cheering on their husband's political careers well one is effectively incapacitated by dementia and the other

54:22

one's literally in a mental hospital wouldn't you think that a woman who loved a spouse who loved her husband say

54:30

no it's not good for him why is Dr Jill not the villain in this story what is her problem what a ghoulish power

54:37

seeking creep and the same with jelle fedman her husband's in a mental hospital like

54:43

what yeah absolutely these women are monsters I'm not going to mince words here these women are absolute monsters

54:49

if you were in a relationship and you love someone and you've and you've had a family with this individual you would never want to see them suffer period now

54:56

imagine allowing them to suffer publicly that's exactly what these women are doing they are they are somehow become

55:02

creatures on their quest for power and they should be ashamed of themselves but I promise you they won't be because it's all about serving the party and if they

55:08

have to sacrifice their husbands oh well yeah if my wife did that to me because she want to spend the weekend at Camp

55:14

David I my feelings would be hurt a lot um Ken I I appreciate it great to see

55:19

you tonight thank you thanks for having me say Louis one of the Great American

55:26

cities degraded at very high speed under a Soros back da called Kim Gardner now

55:33

the murder of a homeless man in the middle of the day on the sidewalk caught on tape which really is kind of a

55:39

metaphor for what's happened to our cities that's straight ahead plus the covid experts told a lot of lies that

55:46

have now been debunked they're not going to admit that of course they want you to forget we're not in the business of

55:52

forgetting however we always keep the tape we be be right

55:58

back the Attorney General of Missouri is now trying to remove the Soros back da

56:04

in St Louis woman call him Kim Gardner who has done so much to destroy that City we hesitate even to show you this

56:11

tape but we feel Duty bound to do so because this murder in St Louis says a lot about where our cities are tonight

56:18

fox say Kevin Cork has it for us Hey Kevin Tucker It's not that crime hasn't always been a real problem in America's

56:24

Maj cities it has I live here in Washington I can attest to it it's just that there's an increasing scale and

56:30

scope and frankly the brutal nature that really shocks the censes leaving citizens begging for help in some cases

56:38

soros's back da are facing increased uh scrutiny an intense scrutiny at that

56:44

take for example as you point out that disgusting incident that happened in St Louis yesterday outside the globe building in a video posted online you

56:50

see a guy by the name of Deshawn Thomas he stands behind a homeless man sitting on the sidewalk calmly loads his weapon

56:57

and shoots him at Point Blank Range Witnesses suggest that the pair may have been fighting outside of a Shell gas

57:02

station up the block moments earlier Thomas was arrested a short time later at a library though it's unclear if he

57:10

was out on probation at the time or if he has a long rap sheet probably but we'll have to wait and see so far there

57:16

have been 25 murders in the city already in 2023 leading to growing calls to out

57:22

soros's backed Attorney Kim Gardner in part because of the number of repeat

57:28

offenders committing violent crimes in the city now you may have heard of this one earlier this month a 21-year-old

57:34

convicted felon by the name of Danny Daniel Riley struck a young volleyball player with his car pinning her to the

57:40

ground robbing her of the use of her legs as a result critics say he should never have been out in the first place

57:46

and they are blaming Gardner for it Tucker man something is wrong for sure

57:51

Kevin Cork with that thank you so much you bet so the whole covid thing started about 3

57:58

years ago and we're finally learning what a lot of people suspected from the beginning which is that the experts

58:03

either didn't know what they were talking about or they were lying now it's kind of depressing to go through all those lies but it's also necessary

58:10

if you don't want that to happen again and we definitely don't Dr Marty McCary has been chronicling them keeping track

58:17

he's a public health expert Professor John's Hopkin school of medicine and he joins us tonight to list some of the

58:23

things we learned that aren't true doct thank you than you so much for coming thank you for keeping track of this cuz I I think you need an after action

58:29

report to make you better the next time so what have we learned was untrue well Tucker I just testified before Congress

58:36

and of course those on the left were asking about misinformation as if that was the big problem and of course

58:42

microchips in the vaccines as a conspiracy theory came up now I don't know how many people chose not to get

58:48

the vaccine because of fears of a microchip maybe two people in America or five how about the misin information

58:55

propagated by public health officials the biggest deliverer of misinformation

59:00

has been the United States government and the data has caught up with all the lies now and has actually debunked many

59:07

of these lies for example natural immunity is not protective the Lancet study tore that apart showed it is

59:14

absolutely as effective uh as vaccination and probably more effective that school closures would reduce

59:20

transmission the Europe experience proved that wrong the schools were open clear and free throughout with the

59:27

similar transmission rate so that was wrong that myocarditis is more common

59:32

after covid infection than it is from the vaccine not true JMA Cardiology showed that it was 4 to 28 times more

59:40

common after the vaccine in a particular cohort that the lab con leak was a conspiracy theory both Dr farzon and

59:47

Gary the nation's two top biologists told Dr fouchi in January of 2020 in an

59:53

emergency meeting that fouchy called that they thought it was the lab leak and yet it was built as a conspiracy and

59:59

finally that the balent vaccine and the boosters are effective and necessary for

1:00:05

young people we've had no randomized control trials Dr jaw at the White House said it's crystal clear to me it's

1:00:11

Crystal Clear a young healthy person has does should not get it no one on the Congressional committee or at the CDC

1:00:18

has ever been able to tell us if any healthy American child has died of covid it may have been a couple could have

1:00:24

been three five 10 over three years that's way below any respiratory pathogen how can you push something so

1:00:31

aggressive with such absolutism and Dogma without the the data we don't even

1:00:37

know if any healthy child has ever died of covid now public health officials in the CDC are proposing that a 12-year-old

1:00:45

healthy girl get 60 mRNA covid vaccines in her average lifetime one a year this

1:00:52

is where we've got to demand Data before following these

1:00:58

recommendations that's what they're demanding right now it's hard even to believe that given everything we know

1:01:03

that seems deranged and and scary annual vaccinations for all people that's the

1:01:09

Mantra right now and it's All or Nothing is last question doctor is there

1:01:15

an organized I mean that's so that's so unwise you got to think there's an organized resistance to that do you think that could actually happen it

1:01:21

could become compulsory yeah most of the resistance are practicing Physicians but because anyone who disagrees with the

1:01:28

Mantra is dismissed or censored or deleted or excluded from National meetings it appears as if there is a

1:01:35

unified consensus of Physicians the cdc's own study found that 40% of Pediatricians do not recommend the covid

1:01:42

vaccines for children that should say a lot and when I go to the doctor's meetings none of them have been wearing

1:01:48

masks over the entire last year that should say a lot yeah it does say a lot Dr mtv McCary a brave and learned man

1:01:55

thank you so much thanks so if you work at any kind of big company or apologies but you probably

1:02:02

had implicit bias training one physician has enough self-respect to say enough Dr

1:02:09

Marilyn Singleton joins us next on that

1:02:14

topic this is a Fox News Alert there's a potentially significant hearing underway

1:02:20

in the House of Representatives the house select committee on the Communist Chinese party is folding holding its

1:02:26

first hearing on the Chinese Communist threat to America you're seeing pictures live right now we're going to monitor

1:02:32

what's going on there and if anything happens of course we'll bring it to you right away so this is one of those stories you

1:02:39

wonder like how much longer can we ignore this we seem to be getting a lot closer to a major Aviation disaster in

1:02:45

this country there are no minor Aviation disasters near misses are now occurring every few days not an overstatement on

1:02:53

Wednesday an air traffic controller in Burbank California cleared a Mesa Airlines jet to land on a Runway where a

1:02:59

Sky West Jet was in the process of taking off then when the Mesa Airlines jet abandoned The Landing the controller

1:03:05

briefly directed the two planes toward each other the controller kept mixing up right and left in her Radio Calls the

1:03:13

planes were less than a mile apart at one point and for objects moving as fast as airplanes that's very close now this

1:03:19

is similar to another incident that happened earlier this month in Austin Texas in that case a FedEx cargo jet

1:03:25

came within a 100 feet of a Southwest Airlines jet after the FedEx jet was cleared to land on a Runway where the

1:03:32

Southwest Jet was taking off that shouldn't be allowed that should never happen but it's happening quite a bit on

1:03:38

Monday night a Jet Blue flight at Boston's Logan Airport nearly hit a Learjet the Learjet began its takeoff

1:03:44

roll without clearance as the JetBlue flight was Landing the Jet Blue flight cleared the Learjet the private aircraft

1:03:51

by less than 100 ft this is totally crazy and it's also part of a much

1:03:58

larger problem of Transportation in the United States today in manate County Florida a train carrying sheetrock and

1:04:04

more than 30,000 gallons of propane fuel derailed Hazmat crews are on the scene

1:04:10

at this hour so far no one has been evacuated although officials say that could be coming soon again this keeps

1:04:15

happening just a week ago Hazmat teams deployed in gothenberg Nebraska after a Coal Train derailed there and of course

1:04:22

as you well know earlier this mon there was a derailment and then a man-made mushroom cloud in East Palestine Ohio so

1:04:29

you have to wonder what happened to the trillion doll infrastructure Bill the one that Joe Biden can't stop bragging

1:04:35

about the infrastructure bill that was actually an equity Bill the one that put solar panels on government buildings

1:04:42

what about our infrastructure what about the airplanes why do they come within 100 ft of each other no one in the Biden

1:04:49

Administration appears to care and unless they start to care people are going to die for real

1:04:56

so the thing you want to watch is not the periphery but the core that is the critical Industries Aviation

1:05:03

Transportation more broadly energy and medicine and there's a

1:05:08

problem in the medical profession for some reason medical schools and hospitals have become convinced that the

1:05:15

appearance of your doctor is the most important thing you can judge a book by

1:05:20

its cover and CNN of course is pushing it hard watch right now fewer than 6% of doctors in

1:05:27

the US identify as black or African-American that's despite the fact that the community makes up 12% of the

1:05:34

country's total population and that's raising concerns about the impact on public health research shows that when

1:05:40

we have a more diverse physician Workforce there's more understanding and more trust between the patient and the

1:05:46

doctor if the doctor has an understanding of the patient's cultural experiences cultural background lived

1:05:52

experiences especially when it comes to racism or discrimination or other aspects of their life that can help with

1:05:59

that physician patient a relationship it's super simple if there

1:06:04

was ever a place where we need a pure meritocracy the most qualified people get the jobs it's in medicine most

1:06:11

doctors believe that very few are willing to say it Dr Marilyn Singleton is one of them she's got a piece in the

1:06:16

Washington Post called I'm a black physician and I'm appalled by mandated implicit bias training and we are happy

1:06:22

to have her join us tonight Dr Marland Singleton doctor thank you so much for coming on why you've practiced medicine

1:06:28

for a long time thank you for inviting me oh well we're delighted to have you what have you noticed that has changed

1:06:35

in your profession in medicine recently and why are you concerned about it well I'm concerned one I grew up in a

1:06:45

time when there was segregation and we move from black people having to go to

1:06:50

Black universities to where it was completely open and I was was able to go to top tier universities where my

1:06:56

parents didn't necessarily do that and then when I went to medical school

1:07:02

diversity meant groups of different people all over the country different backgrounds and whatnot all we wanted to

1:07:09

do was get good grades and be the best doctor that we possibly could and take

1:07:14

the best care of patients suddenly we fast forward now and we don't even hear

1:07:21

about getting good grades all we hear about is oh a black patient should have a black doctor well that is so wrong a

1:07:29

black patient should have a good doctor and that's what all patients want and

1:07:34

certainly black patients don't want that and you believe me if you get rolled

1:07:40

into an emergency room you don't want a patient having to look up at that doctor sideways and think hm is this one of

1:07:47

those evil white Devils or is this a good doctor who's going to take care of my stab wound to the abdomen and this is

1:07:56

so wrong and it's being pushed on people and I don't like

1:08:03

the demonization of my colleagues that I've worked with for years save patients

1:08:09

lives with have them come to me for advice on how to do something and

1:08:15

suddenly I'm not supposed to trust them they're not supposed to trust me am I

1:08:20

suddenly a stupid black person it's it's completely flipped on its head there was

1:08:25

a time when black people were considered not up to the to the task to the job and

1:08:32

couldn't be professionals couldn't be doctors and we are we're smart we're just like anybody else and suddenly

1:08:39

white doctors are the ones that have the evil Aura around them and we expect

1:08:46

black patients to then want to trust that doctor and it's Hokum that black

1:08:53

patient needs a black doctor number one it could never happen there aren't enough doctors how could you match these

1:08:58

people up what happens when you go into an emergency and I honestly as an

1:09:05

anesthesiologist I've done plenty of emergencies I've been a doctor for hate to say 50 years now and patients look at

1:09:13

you and years ago all they wondered are you

1:09:19

old enough to know how to do this and they wondered about about your competence and this is wrong having so

1:09:28

much focus on race and bringing back the kind of focus that we fought for so many

1:09:34

years to be gone to look at people as individuals and their talents their

1:09:42

personality their compassion and they're wiping it away

1:09:47

and it's just wrong it's criminal why are you one of such a tiny

1:09:53

minority of practicing Physicians willing to say that well I think it's like so many

1:10:01

times and I'm sure you've been in these meetings where everybody's thinking the same thing but nobody wants to say it

1:10:06

out loud and with and part of it is what's happening in medicine all over

1:10:12

that we now have private practice only 47% of Physicians and so you're looking

1:10:18

at 53% of Physicians are employed or they work for one of these big Health Systems

1:10:24

they're afraid how they're afraid to lose their jobs and it's kind of hard to

1:10:30

blame them when you're in private practice and you're taking care of your own patients for your own

1:10:35

self you know you can say what you want and your patients when they love you

1:10:40

they love you and they don't care what color you are they're just glad that you give them good

1:10:46

treatment bless you for saying that I mean it it sounds obvious but when you're one of the only people willing to

1:10:52

say it we're really grateful for for your willingness to do that Dr Marilyn Singleton I appreciate it thank

1:10:58

you so if you want to control a country in his people obviously you destroy their history so they don't know what

1:11:04

happened before and then the future is yours so now the woke mob is in the

1:11:09

Pentagon and they've decided to desecrate Arlington National Cemetery not so fast woke mob at the Pentagon we

1:11:16

get to tals

1:11:22

next democracy as they say is on the ballot in Chicago tonight where the worst mayor probably

1:11:29

in recorded history Lori Lightfoot is up for election she's the one who hired the

1:11:34

thousand cats to fight the right Pro rat problem in Chicago Trace Gallagher has

1:11:39

been following all of this he joins us with an update hey Trace hey Tucker so the polls are now closed in Chicago and

1:11:45

they're now in the process of counting the early ballots we're talking about some 240,000 ballots and so far it

1:11:52

appear appears to be a very tough night for the incumbent mayor Lori Lightfoot we now have

1:11:58

73% of the early votes counted and Paul valis this is the former Chicago Public

1:12:03

School CEO has 36% of the vote now Valas has been endorsed by the police union he

1:12:09

bills himself as the tough on crime candidate in second you have Brandon Johnson he's a current Cook County

1:12:16

Commissioner and former school teacher who is supported by the Chicago Teachers Union he's now pulling about 20% of the

1:12:24

vote and in third place Lori Lightfoot she's at just under 16% not really doing

1:12:30

well in recent weeks Brandon Johnson's surge has made headlines because it was

1:12:36

so surprising and so fast but this is primarily about crime because even

1:12:41

Chicago is tired of the increase in violent crime all across Chicago land so once the early ballots are counted

1:12:47

they'll move on to the rest of the boats but remember it could take a while because if one candidate does not get

1:12:53

more than 50% it goes to an April 4th runoff and that means this could last

1:12:59

for weeks we should know with 73% of the early ballots counted we can now tell

1:13:04

you that Paul valis will be in that runoff whether Lori Lightfoot makes the runoff is yet to be seen so she is known

1:13:13

for dancing at awkward times it appears that Lori Lightfoot will likely not be

1:13:19

doing any dancing tonight because she may not even make it to the next round

1:13:24

we'll keep counting we'll keep tabulating and get back to you with results Tucker Trace Gallagher

1:13:30

consistently the bearer of good news there not many of those thank you trace you

1:13:36

bet Lor liuck got re-elected you'd really have to rethink the system I mean what would that be

1:13:43

terrifying so if you want to control a country obviously you have to erase its history so no one has any idea what went

1:13:51

before and then the future is yours and that's why they tear down monuments to our past in New York they tore down the

1:13:57

Teddy Roosevelt statue the greatest of all American presence the most popular it stood there for many years and now

1:14:04

it's gone rioter have done this all over the country so that wasn't enough so now

1:14:10

woke lunatics at the Pentagon have decided to desecrate America's biggest

1:14:15

and most significant Cemetery Arlington National red across from Washington DC

1:14:21

and tear down a memorial to Civil War dead Chris Bedford is the executive editor of the Common Sense Society just

1:14:27

wrote Such a thoughtful and interesting piece on what is happening and what it means he joins us tonight Chris Bedford

1:14:32

thank you so I I'm not sure I can in any way improve on what you wrote summarize it for us if you

1:14:40

would well right now what they're trying to tear down is the as a monument in Arlington that marks the Confederate War

1:14:46

dead and this is not a monument to Victory it's not a monument that says Rise up again this war is coming this is

1:14:52

not a this is a Monument to reconciliation it's a ferary monument that stands over the graves of people

1:14:58

including the architect and a number of other uh Confederate War Dead uh who who are buried there now in Arlington this

1:15:05

is something that symbolizes peace at its Center is a robed woman holding a laurel crowned with uh crowned with

1:15:12

branches and also holding the plow share that that stands for beating our swords into a plow share now beneath that is a

1:15:18

freeze centered by on Athena a circular freeze that can that shows Southerners answering the call to war and that's

1:15:24

something the critics have a problem with it does show a romanticized and idealized version of the South there but

1:15:30

it is in its core and a monument to that reconciliation and it came during a very complicated period in time if we think

1:15:36

that 2020 was complicated the period after the Civil War where about 2% of the American population gave their lives

1:15:43

in battle was extremely tense and complicated for decades afterwards Confederates were not even allowed to T

1:15:48

not even the families were allowed to tend the graves of those who were Fallen but America actually got through what

1:15:54

most countries never get through they got through a Civil War and 30 years later when they end up fighting side by

1:15:59

side in the Spanish American war that Mutual affection was rekindled and there was a softening of hearts and people who

1:16:05

had fought on both sides reached out to each other and said we're going to try and come together and build something to

1:16:11

reconciliation now the people who built this the daughters of the Confederacy know that this was not a perfect country

1:16:16

not a single one of them could vote at that period there were still a lot of problems that we had to get through but coming together in that complicated

1:16:22

history is what's essential for us to remember and tearing it down is very simple-minded how how vicious to do this

1:16:27

to a graveyard 150 years later is there very quickly is there any way to stop this eraser of American History it's not

1:16:34

theirs to erase is it I think there is the Congress has given the Pentagon the ability to erase

1:16:41

these things but they're talking about base names and Roads things like an Arlington National Cemetery fall under the US Commission of Fine Arts that's a

1:16:48

that's part of the cemetery that's Civic architecture that's something the military though they like to bulldoze over Authority actually has to set maybe

1:16:55

take a back seat too yeah you you can't desecrate graveyards sorry I don't care

1:17:01

who's buried there Chris Bedford thank you appreciate it thank you so we spent

1:17:06

a lot of time beating up in the White House Press cor but there is someone in the White House Press cor is worth knowing amazing man his name is Simon

1:17:12

atiba he's covering the White House in American government for an audience in

1:17:17

Africa and we thought it'd be great to sit down with him it was better even than we imagined he grew up impoverished in Cameroon before becoming the toughest

1:17:25

reporter in Washington we asked him in a long conversation about his life for Tucker Carlson today here's part of it

1:17:33

when I thought that everything was great I decided to travel from Cameroon to Nigeria by sea and I was attacked by

1:17:41

pirate on the Gulf of K and I'm not going on vacation with you

1:17:48

I'm I'm sorry it's not personal yeah and I was like so you were so you finally get out of prison in Northern Cameroon

1:17:54

and decid to go back to sary by boat but you get attacked by Pirates I was attacked by pirates on the Gulf of Guinea and they had an AK piracy is

1:18:04

rampant around you know between Cameroon and Nigeria and I was almost getting to

1:18:10

Nigeria and we saw this boat this speed boat that we to came towards us we're

1:18:16

like lie on the ground lie on the ground your money bring everything out and and

1:18:22

eventually the you know they had this gun that was the first time in my life that I thought

1:18:28

I'm oh my God I'm going to die you know having a gun to your

1:18:36

head it was I thought this guy may pull the trigger yeah and but eventually the

1:18:44

guy didn't pull the trigger survive and it became too much other things

1:18:50

um and I decided to you know

1:18:56

um become who I really wanted to be because I I feel like I was given a

1:19:03

second chance every time and I decided to really live live life to the fullest

1:19:10

and that's I ended up in the US so how do you get from the point where you've got an AK-47 deer head from a pirate in

1:19:17

the Gulf of Guinea to how to be in the White House Press Room so so and so I'm back in Nigeria

1:19:25

doing my stuff I don't have money life is always tough I'm covering the US Embassy they are giving grants to

1:19:31

everybody except Simon they asking Simon every day to come and cover them and I feel like telling them don't you have

1:19:37

eyes I've been covering you for five years I'm getting old you guys are not giving me any thing and you're giving

1:19:44

things to people who can do anything and and I'm here don't you see they were

1:19:49

blind and they were not seeing and and I feel feel like I feel like oh my God all

1:19:56

the money that comes from the US to these countries don't actually go to the people who need it to the people who do

1:20:03

things that can even benefit the US here I am covering you Ambassador after

1:20:09

Ambassador doing every single thing and you give scholarship to every single

1:20:15

person around me except the person who has been there for you don't you see and

1:20:20

and they didn't do anything and I decided to you know take my life into my

1:20:26

own hand and decided to move to the US and work for today news Africa and the

1:20:32

reason I decided to cover the Biden Administration was because I knew as I said he was the

1:20:40

perfect good guy CNN had told me for

1:20:45

years years in that the racist were the conservative the Republicans and those

1:20:52

were the bad guys the people um uh who live in the midwest with you know

1:20:58

redneck white guys with no college degrees who live in the midwest don't

1:21:04

have anything to do with them because those are the racist and you can't have anything to do with them  
stick with

1:21:09

Biden and and so I ended up at the White House with President Biden the good

1:21:16

guy and as soon as he got there they refused to talk to him

1:21:23

Simon AA one of the great guys on Fox Nation now we'll be right back supposed to be talking about

1:21:30

health care today but it didn't take long for it to get pretty creepy watch I had a nurse named Pearl  
Nelson military

1:21:37

she'd come in and do things that I don't think you learned in medical school nursing school she'd  
whisper in my ear I

1:21:44

didn't couldn't understand it but she'd whisper she'd leaned down he'd actually breathe on me to make sure that I was

1:21:50

there was a connection human connection what welcome to Tucker Carlson sign happy Monday so how would you define the B

1:21:55

Administration well really the Hallmark has been an almost otherworldly disconnection from the actual Affairs of

1:22:04

the United States if it's really happening in this country the Biden Administration will pretend it's not in

1:22:10

fact White House officials seem to have no idea what's going on in our country and no interest in learning about it the

1:22:15

weak at train derailment poisoned an entire town in Ohio the transportation secretary the man in charge of

1:22:21

preventing train derailments held a press conference attacking white construction workers cuz they're the

1:22:27

problem it's 1952 our 80-year-old president meanwhile

1:22:32

80 years old he seems convinced it's 1915 and we're all living in rural

1:22:37

Alabama burning crosses in the front yards of terrified sharecroppers to amuse ourselves we don't have

1:22:44

TV Biden gave a speech the other day in 2023 to denounce lynching as if lynching

1:22:52

is still happening in the United States it all seems a little delusional so it was with genuine relief

1:22:59

that we saw today one of Biden's top cabinet officials Janet Yellen who runs the treasury Department sign off her

1:23:04

Twitter account finally leave Washington and meet with actual flesh and blood

1:23:09

human beings who were suffering and not only did she meet with them to prove her sincerity jenet Yellen brought with her

1:23:16

a check for a billion dollars and we'll admit partisanship as said we were happy to see that finally someone in the

1:23:22

bid Administration who actually cares who's getting on an airplane to show

1:23:27

concern that's the good news the bad news is Jenny Ellen was not in East Palestine she was in Ukraine watch and

1:23:35

today I'm proud to announce the transfer of an additional amount of over \$1.2

1:23:43

billion that's the first charge of about \$1 billion in direct budget support that

1:23:50

the United States will provide in the coming months we love you so much that we will

1:23:57

give you whatever you want anything a new bicycle a puppy a pony it's yours we

1:24:03

love you billions more for Ukraine your tax

1:24:08

dollars but that money is not going to be going to the newly poisoned communities of Eastern Ohio who cares about them it's not going to be

1:24:14

earmarked for the hundreds of thousands of American families who have lost loved ones to the opioid epidemic an epidemic

1:24:21

that was created by democratic donors at Purdue Pharma no that money is going to zilinsky and his wife in Kiev and that

1:24:27

money will complement the more than a 100 billion in tax dollars they've already received from the US Treasury

1:24:33

and you've got to think as they watch this tonight assuming there's still TV reception in Palestine the people who

1:24:38

are stuck there are kicking themselves If Only They had paid Joe Biden's crackhead son 80 grand a month for a

1:24:44

no-show job Jenny Ellen might be visiting them today it seemed like a lot of money at the time but that turned out

1:24:50

to be the best investment those Ukrainian oligarch ever made it was like buying Google stock 20 years ago talk

1:24:55

about a jackpot and by the way nobody understands the principles of political

1:25:00

Venture capitalism better than ironically the Communist Chinese government does they paid Hunter Biden

1:25:06

too and this weekend we learned a little bit about what they got in return the Wall Street Journal reported the bid

1:25:13

Administration has finally concluded that yes covid was not naturally occurring it didn't emerge organically

1:25:19

from a penguin whatever that is at the wet Market whatever that is no the virus came from a Chinese military lab where

1:25:25

it was created that's the determination of the Department of energy based on new intelligence that of course everyone

1:25:32

already had now we learned this interestingly from a newspaper we did not learn it directly from the bid

1:25:37

administration because Joe Biden hasn't said a word about it and that's a little odd a million Americans they tell us

1:25:44

died of covid close to 7 million died globally so it's inherently a big story

1:25:50

now it is true that the origin of Co is not directly related to anti-trans racism so it's not a natural for Joe

1:25:57

Biden he doesn't have his talking points already written but it might still make for a good topic for say a prime time address to the nation he might mention

1:26:04

it to us he might answer a few other questions while he's at it for example is Joe Biden still sending money to

1:26:10

China for biotech research the administration was actually doing that sending cash to that same Wuhan lab as

1:26:17

recently as last year are they still doing that and bigger picture have their views on China changed now they know

1:26:23

that China is responsible for the deaths of almost 7 million people now we know China Unleashed Co on the world

1:26:29

intentionally or not and then lied about it for sure and then put hid life-saving genetic information about the virus from

1:26:36

the scientists were trying to respond to covid now we know all of that does Joe Biden still consider Vladimir Putin he's

1:26:42

so bad the greatest threat to world peace and stability it does seem like this story

1:26:49

could overturn some of our previous assumptions well Joe Biden's National Security adviser Jake Sullivan went on CNN

1:26:55

yesterday to answer precisely none of these questions instead he told us we're still not sure where it came from watch

1:27:01

this did the Corona virus pandemic start in the lab is that what you believe

1:27:07

now well Dana there is a variety of views in the intelligence Community some elements of the intelligence Community

1:27:13

have reached conclusions on one side some on the other a number of them have said they just don't have enough information to be sure and if we gain

1:27:21

any further insight or information we will share it with Congress and we will share it with the American people but

1:27:26

right now there is not a definitive answer that has emerged from the intelligence community on this

1:27:32

question we just can't say for sure where covid came from there's no consensus we're still debating

1:27:39

it well there's never a consensus in Washington about anything particularly now with the Intel

1:27:45

agencies they're lying we know perfectly well where covid came from we've known this for years in fact one of one of the

1:27:52

very first things we knew about covid was that it was an engineered virus that escaped somehow intentionally or not

1:27:58

from a Chinese military biolab in Wuhan it was in early March of 2020

1:28:05

three full years ago at the very beginning that we did a long open on

1:28:10

this show about the Chinese research paper whose authors later disappeared now these Chinese scientific

1:28:17

researchers scolded the Chinese government for the lack safety standards that they said allowed covid to escape

1:28:25

and infect the world this was 3 years ago watch this in fact the outbreak may have begun not in a public Meat Market

1:28:32

but in a poorly run Chinese laboratory now that's not our Theory anyone who raises that theory on American

1:28:38

television is attacked as a conspiracy Monger but this is the theory from a now censored Chinese paper a draft paper

1:28:46

posted in mid-February scientists at the South China University of Technology suggested the virus outbreak coronavirus

1:28:52

outbreak began at the Wuhan Center for Disease Control where an animal may have infected a researcher who then spread

1:29:00

the disease outside the facility the paper is explicit about this we're going to quote it the killer Corona virus

1:29:06

probably originated from a laboratory in Wuhan end quote so it's not like we did a lot of

1:29:14

hard-hitting reporting with our Chinese speaking staff that paper was in English

1:29:20

on the internet and anyone who was interested could have found it we were just interested that's why we found it

1:29:25

and then we found someone who was there we found a Chinese physician a scientific research who worked for the

1:29:31

Chinese government who was in and around Wuhan when covid emerged from that lab her name is liing Yan and we did a bunch

1:29:38

of interviews with her here's one from my first report I can present the solid

1:29:44

scientific evidence to our audience that this virus covid-19 sasco 2 virus

1:29:52

actually is not from nature I work with the top Corona virologist in the world

1:29:58

so together with my experience I can tell you this is created in the lab this

1:30:06

is from that template owned by China military and also it is spread to the

1:30:12

world to make such damage to make such damage do you believe the Chinese

1:30:18

government released this intentionally on purpose did they do this yes of course it's

1:30:26

intentionally wow now we thought that was a story so there was a physician who

1:30:32

worked on Corona viruses for the Chinese military who was in Wuhan telling us in

1:30:38

September of 2020 that the Chinese government did this intentionally to wreck the West to kill people and

1:30:44

destroy the economies of its Rivals here in the west now if you're a middle class Christian American it's hard to imagine

1:30:50

that level of malice EX existing anywhere in the world you just would never consider doing something like that but with the Chinese are they serious

1:30:58

enough probably but instead of following up on

1:31:03

that people attacked the woman you just saw really attacked her and then

1:31:08

attacked us for giving her airtime pants on fire you're lying said the quote fact Checkers but she wasn't lying and Tony

1:31:16

fouchy and many others in the US government knew that she wasn't lying in fact they knew the truth about where covid came from long before the rest of

1:31:22

us had even heard the term Co in mid November of 2019 a friendly Asian government we have learned sent a cable

1:31:28

to American officials warning that there was evidence or something strange going on in Wuhan and it looked like a

1:31:34

dangerous leak from a biolab they knew that the origins of covid were never a

1:31:40

secret the real story The Great outrage of this story is that the people who

1:31:45

knew or should have known the truth lied about the truth why to hide the Chinese

1:31:50

government's role in mass murder the killing of almost 7 million people and the destruction of the American economy

1:31:57

that's the interesting part looking back 3 years later from the beginning of the outbreak the American Media as one took

1:32:06

the side of the Chinese government in this new propaganda War over covid and Trump once again to his credit knew he

1:32:13

knew exactly where this came from he didn't say so directly he should have but instead he alluded to it he called

1:32:19

Co the China virus and when he did that he was over the target so the Chinese government attacked him they've learned

1:32:24

a thing or two from watching American politics as a quote racist one Chinese news Outlet tweeted

1:32:30

this quote racism is not the right tool to cover your own incompetence shut up

1:32:36

racist they saw working in America we're going to try that and it

1:32:41

worked and then the entire American Press Corp covered for the Chinese government people like David from at the

1:32:48

Atlantic oh he's so smart d David FR immediately pared that slur from the

1:32:55

Chinese government you have to ask yourself was David from taking money from Beijing to repeat their lies we

1:33:01

can't confirm that but he might as well have been taking money from Beijing and it wasn't just David from NBC News calls the called the

1:33:08

phrase Chinese virus quote both inaccurate and harmful in tying racist associations between the virus and those

1:33:14

from China of course the virus was from China it was from a Chinese military biolab and it may have been released on

1:33:20

purpose to kill people it didn't matter no one asked a single question Joe Biden and his lackeys in the

1:33:27

media all repeated the talking point watch this but neither should we Panic

1:33:32

or fall back on xenophobia labeling covid-19 a foreign

1:33:37

virus does not displace accountability president referred to the Corona virus

1:33:42

as a quote foreign virus and I think it's going to smack uh it's going to come across to a lot of Americans as

1:33:48

smacking of xenophobia the administration's Labb in of this virus as foreign is undoubtedly playing into

1:33:55

the rising xenophobia about it Trump isn't cautioning us to check our racism but is rather stoking xenophobic

1:34:01

sentiment the President says it's a foreign virus as if this was launched on us like an attack we know what that's

1:34:07

about that's about him playing xenophobia works with his base why do you keep calling this the Chinese virus

1:34:13

why do you keep using this from racist it's not racist at all no not at all it

1:34:18

comes from China every one of the people you just saw should resign in disgrace and should

1:34:24

spend the next decade in ashes and sackcloth pondering what they've done

1:34:29

which is cover for a crime and by the way if the US media had swung behind the

1:34:36

evidence in this story and pressed where did this virus come from then it's at least potentially conceivable that

1:34:43

scientists in the United States would have forced the government of China to release the information they had about the genetic makeup of covid maybe we've

1:34:50

had a vaccine that worked for example or a Medical Response that saved Americans lives but they didn't none of them did

1:34:58

the New York times's top Global health and covid reporter a person called apurvi purva

1:35:06

mandav wrote quote someday we will stop talking about the lab League Theory and maybe even admit its racist Roots but

1:35:13

alas that day is not today what where is the Oberlin sociology Department New

1:35:18

York Times pipeline like when did that start why are they hiring the dumbest and most reflexive people who take their

1:35:24

opinions wholesale from The Hive of Twitter there were a few people who are not deterred by racist shut up they said

1:35:32

what was clearly true and for their trouble they were denounced as crazed science denier science deniers okay

1:35:38

Senator Tom Cotton was attacked because he relied on a map and common sense to ask a very simple question here's what

1:35:45

he said here's what we do know this virus did not originate in the Wuhan

1:35:50

animal Market just a few miles away from that food market is China's only biosafety level four super laboratory

1:35:58

that researches human infectious diseases now we don't have evidence that this disease originated there but

1:36:04

because of China's duplicity and dishonesty from the beginning we need to

1:36:10

at least ask the question well yeah and by the way that wasn't a guess a wet Market is a seafood

1:36:18

market a penguin is a mammal so they weren't

1:36:24

selling Penguin in a seafood market for one thing for another a group of Chinese

1:36:29

researchers went and interviewed everybody in the wet market and asked have you ever seen a penguin for sale

1:36:35

here or bats another mammal no not one hat that was on the internet we read it

1:36:40

we reported it that was February 2020 so what we knew at that point was the Chinese government's lying Tom Cotton

1:36:46

was absolutely right and for his trouble he was called insane a conspiracy theory

1:36:53

Tom Cotton a couple of days ago uh spouting a conspiracy theory that the

1:36:58

Chinese made this virus up don't try to spool up uh some of whoever was wearing

1:37:05

10 tin foil hats in your audience let's apply aam's razor and just oh crazy

1:37:10

crazy this is crazy this is an insane thing to do it's just wildly irresponsible and was totally

1:37:16

unnecessary I don't know what Tom Cotton gets out of this in the 1980s I remember when the far-left tra  
Fred in rumors

1:37:22

about HIV having been invented in CIA Labs the farite has now found its own

1:37:28

virus conspiracy theory oh yes let's have the plagiarist

1:37:33

Fred Zakaria on to tell us about science but it wasn't just Tom Cotton who was

1:37:38

attacked it's it's almost too unpleasant to bring you the story because the wall

1:37:45

of dishonesty was impenetrable at that point 3 years ago the one thing we needed to know where where  
did this come

1:37:51

from was the one thing they wouldn't let you even consider in fact if you did you would be

1:37:57

unpersoned Facebook banned any user suggested the virus was man-made because and we're quoting  
the science was

1:38:03

settled was not settled at all there was no science we didn't know anything as NPR reported quote  
scientists debunk lab

1:38:11

accident theory of pandemic emergence really on what basis they had no evidence to quote debunk it  
but that

1:38:17

didn't stop Vox from quote reporting and we're quoting now no Corona virus did

1:38:22

not start in a Chinese lab they had no idea they were just Flatout Shilling for the Chinese government and hiding its

1:38:29

complicity in mass murder what and then a woman called Laura helmouth the diversity hire now running

1:38:36

the once but no longer respected publication Scientific American said quote it's a conspiracy theory to

1:38:43

believe a lab leak had occurred but it did that's the thing facts still matter

1:38:48

every facet every element every Link in the chain that connects every part of

1:38:54

elite America to itself pushed the same lies even the the

1:39:00

quote comedians they were on propaganda Duty too watch this he's also pushing us

1:39:05

intelligence to find evidence for this theory that the virus was accidentally released from a lab in Wuhan that's his

1:39:13

new angle to feed the Wingnuts to treat this virus like it was a conspiracy of

1:39:18

some kind it should have never happened this plague should never have happened

1:39:24

it could have been stopped but people chose not to stop it what people

1:39:29

tomorrow he'll blame the Spanish Flu on Antonio Banderas yeah imagine if you're a comedian and

1:39:36

all of a sudden your Q card has all kinds of talking points from politicians and foreign governments on it don't read

1:39:42

it you degrade yourself and you become complicit in the greatest crime in

1:39:47

history so you have to ask what role did the US intelligence agencies play in all of us of course they

1:39:53

knew well at one point msnbc's Nicole Wallace the single most dishonest person on television now or ever claimed that

1:40:00

and we're quoting Donald Trump is turning his intelligence Community to now investigate a conspiracy theory

1:40:05

about covid coming from a lab and Wuhan by the way we're not watching this woman's show but is she in tears tonight

1:40:12

begging the Forgiveness of her audience no but let's parse this for a second obviously she was wrong about the

1:40:17

origins of the virus it did come from that lab intentionally or not but what's interesting is that she was

1:40:23

also wrong about what Donald Trump's government under the leadership in part of Mike Pompeo was

1:40:29

doing on March 17th 2020 a group of scientists wrote a paper in nature magazine that paper concluded that quote

1:40:35

we do not believe that any type of laboratory based scenario is plausible now well that's the final word

1:40:42

that's the science well internal NIH emails show that Tony fouchy helped edit that paper he did not disclose this

1:40:47

publicly it was all behind the scenes now that's significant because fouchi was funding bat Corona virus experiments

1:40:55

in Wuhan the ones that apparently caused the pandemic so he was editing the

1:41:01

report on the origin of the virus okay that's not peer-reviewed as we say it's

1:41:06

the opposite as Paul Thacker reports on his subst a few days after that paper was published in nature the state

1:41:12

Department's office of Outreach part of the Bureau of intelligence and research began promoting these false finding

1:41:19

these lies the state Department covertly recruited scientists to go around Washington DC and off the record high

1:41:24

level meetings telling everyone who had listened that covid quote emerged naturally in an animal before Crossing

1:41:31

to humans and was not engineered in a lab now the scientists who made this

1:41:38

false briefing who told these lies cited One Source the nature article that was

1:41:43

secretly edited by Tony fouchy in other words and we can give you a thousand other examples America's not China's

1:41:51

America's entire leadership class from the government to the Intel agencies to elected officials to of course the media

1:41:57

in unison spent years trying to hide Chinese culpability for the greatest

1:42:02

crime in human history they cooked up fake papers and bogus data they attacked

1:42:08

anyone who asked obvious questions even people who were in Wuhan at the time who knew and you have to ask why did they do

1:42:14

this could it be that they were implicated in this too they were implicated in creating the worst

1:42:20

pandemic in modern history we're not sure but it's an amazing story as we told you liangang was one of the first

1:42:26

people to tell the truth in the United States a great personal cost she was there she joins us now drct thank you so

1:42:32

much for coming on you said three years ago that you believe that this virus was intentionally released by the government

1:42:38

you once worked for the government of China today we're hearing in this leak to the Wall Street Journal that it was

1:42:44

accidental do you believe this leak was accidental or intentional hi teens thank you for

1:42:50

having me again first I really want to appreciate you and also Fox News have been taking so much efforts pursuing the

1:42:57

choose of Co origin without your help there won't be such Milestone

1:43:03

achievement and I want tell of course it was not an accident and maybe for people

1:43:09

who don't have this kind of B safety Labs three or four exper uh experience on

1:43:15

Corona virus maybe it's easy for them to accept the accident and lab League

1:43:21

however I'm the scientist working in sear lab using Corona virus and I can

1:43:26

tell you based on the print uh protocol and also the other U surveillance uh

1:43:32

system it will be impossible for the lab leak accidentally happened in such lab

1:43:38

and caused the Wuhan outbreak and also the pandemic so definitely now we just

1:43:44

reach to the first step it was from China's lab and we need to pursue the uh

1:43:50

truth of origin and we need to keep going on we know the Chinese government allowed its infected citizens to travel

1:43:57

in huge groups to Western Europe in the early days of the pandemic that was intentional but you believe the whole

1:44:03

thing they came up with this virus and they Unleashed it on the World to destroy the Western economies and to

1:44:10

elevate their own position globally I want uh uh emphasize one

1:44:15

thing is I would say based on the evidence and Source I have that the last

1:44:21

the virus was intentionally brought out of this strict lab and released in the

1:44:28

community however I don't think the outbreak in Wuhan was intentional I

1:44:34

would say it was because CCP government and Military scientist underestimates

1:44:39

the transmissibility that's why finally it got out of control and caused a local

1:44:45

a local outbreak however we should know that CCP government intentionally to Let

1:44:51

It Go all over the world to kill millions of people all over the world

1:44:57

later we just have to hope and pray that you will be interviewed by many other journalists in this country over the

1:45:03

coming weeks now that this has been confirmed you're an eyewitness to it you have a I think a credible story to tell

1:45:09

and I and I really hope you're no longer ignored I appreciate your coming on again tonight leing young thank you so much thank you

1:45:16

terer so Florida is technically a state but there's always been a little country within Florida its own Mouse dominated

1:45:24

Vatican called Disney but the new governor of Florida Ron DeSantis has put

1:45:29

an end to Disney's corporate control over the State of Florida and he joins us straight ahead to explain why and how

1:45:35

be right there well here's a trivia fact you may

1:45:41

not have known since 1967 56 years the Disney Corporation has

1:45:47

enjoyed near tootal control over about 40 square miles of Florida its own little Vatican City and this is by Act

1:45:54

of the Florida legislature which empowered Disney to function effectively as its government Disney could even acquire territory outside its chunk of

1:46:02

land by eminent domain just take it from people now last year people began to wonder why would Disney which is a

1:46:09

totally politicized company they pushes race race hate and sexualized propaganda on children why would they have all

1:46:15

these special benefits in the State of Florida hm good question so last year Florida's legislature passed a bill ending this weird little Arrangement

1:46:23

Disney had of course they hated it Florida's governor Ronda santis pushed for and then signed that bill into law

1:46:29

Governor D santis joins us tonight Governor thanks so much for coming on so why did you see this as an important

1:46:35

thing to do as the governor well as you pointed out Tucker I mean no company or individual in

1:46:42

Florida probably anywhere else in our our whole country has enjoyed their own governing status being exempt from most

1:46:50

many of the laws of the State of Florida massive subsidies so it's not a good arrangement to begin with but if you

1:46:56

remember last year they came out very strong against a piece of legislation to protect parents' rights and to protect

1:47:02

young children from having sexualized curriculum in things like elementary school and then they had Executives

1:47:09

talking about it was their uh intent to jam some of this sexualized programming

1:47:14

in the Disney cartoons and programming for young kids so then we're in a situation Tucker where they're taking

1:47:20

those positions as a company which are antithetical to our values but with this Arrangement Florida was subsidizing that

1:47:28

type of activism that could no longer stand and so now today in the State of

1:47:33

Florida for the first time since 1967 Disney no longer has its own government uh they're going to have to

1:47:40

abide by the same laws as everybody else they're going to finally pay their fair share of taxes and pay all the debts

1:47:46

that they've racked up over these decades but my understanding was in democracy unelected corporate Executives

1:47:52

get to make your laws for you no well you know there's a lot of people

1:47:57

in the corporate press that think that that's what they would rather have you know I just won by 1.5 million votes and

1:48:03

then I go and do what I said I would do and they squeal they would much rather have Disney running the show in Central

1:48:09

Florida but there's a new sheriff in town and I think that this is going to be good for the State of Florida and

1:48:15

I'll tell you Tucker the people that work there have been very very thankful

1:48:20

that we took this action the firefighters for example on site we're so glad that we're finally stepping up

1:48:26

going to listen to them and going to treat them much better so you just wrote a book about what you've done in Florida

1:48:31

called the courage should be free Florida's brute print if I can pronounce it for America's Revival it's out

1:48:37

tomorrow what's it about well people would say how'd you do

1:48:42

it in Florida I mean we've become the focus point of freedom in the United States and even around the world people

1:48:48

look at Florida you just had someone from Spain saying a politician she wants Spain to be the Florida of Europe and I

1:48:55

think what we do is we talk about the different fights that we've had our approach to leadership but at the end of

1:49:01

the day Tucker you talk about it all the time on your show yes we got to fight overweening government very important

1:49:07

and we have a very uh uh vast administrative state that we battle with Biden but you also have Corporate

1:49:13

America going woke big Tech censoring so these are fights all across the scene

1:49:18

and when you stand up for what's right they come after you it isn't easy so you got to have the courage of your

1:49:24

convictions to stand strong but I think what we've shown in Florida if you do that and people see you're willing to

1:49:30

fight for them they'll walk over broken glass Barefoot to vote for you and I'm proof positive that four years ago I won

1:49:36

by 32,000 votes last November I won by 1.5 million votes yeah well movement is

1:49:44

the ultimate election people are moving there so that kind of tells you I would say a lot governor and santz Florida

1:49:49

thank you very much thank you so it's Saturday Night Live which is

1:49:56

filmed live at NBC Studios at 30 Rock on 6th Avenue New York the audience always applauds because they're told to but if

1:50:03

you watch on Saturday night you may have noticed the studio audience that night was weirdly quiet during the end of the

1:50:10

opening monologue they didn't know what to do woody harelson was describing a crazy idea he'd had for a film script an

1:50:16

idea so wild and unlikely no one could possibly take it seriously here's the

1:50:21

idea so the movie goes like this the biggest drug cartels in the world get

1:50:28

together and buy up all the media and all the politicians and force all the people in the world to stay locked in

1:50:35

their homes and people can only come out if they take the cartel's drugs and keep

1:50:41

taking them over and over I threw the script away I mean who is going to

1:50:46

believe that crazy idea being forced to do drugs wait did he just make fun of fizer

1:50:54

I mean Catholic Church is one thing the family is other but fizer not allowed he

1:51:00

must be insane and that was the verdict of the media the Washington Post for example reported this quote on SNL Woody

1:51:06

harelson pushes popular covid-19 conspiracy theory really where's the conspiracy theory there The Daily Beast

1:51:14

echoed that Woody harelson spews antivaxx conspiracies in Rambling SNL Monologue

1:51:21

now Rolling Stone magazine which was founded to fight the power obviously came out on the side of

1:51:27

the guy fighting the power Oh no just kidding Rolling Stone used exactly the same headline so the same people who

1:51:33

said you're crazy for thinking that covid may have come from a Chinese biolab now say you're crazy if you dare

1:51:39

to complain about fizer which is buying them off shut up don't laugh hard to

1:51:46

think of a better way to make Woody haralson's Point than that

1:51:51

so George casone is supposed to be a prosecutor he's so completely out of control so totally politicized that he's

1:51:59

reached a point where he's more concerned with respecting fake trans pronouns than protecting people in Los

1:52:05

Angeles from kid touchers he just suspended a prosecutor for correctly referring to a child molester by his sex

1:52:13

and that prosecutor joins us next well it turns out leprechauns exist

1:52:20

not just on cereal boxes there are a lot of people who believe they have seen a leprechaun or as they're known in some countries as an elf some people think

1:52:26

they've seen elves and that would include the president of Mexico who announced that elves are real naturally

1:52:32

foxes Trace Gallagher has that story for us tonight hey Trace hey Tucker the Mexican president Andre Manuel Lopez oor

1:52:38

better known as amlo says the picture he tweeted out was taken a few days ago by an engineer who works for the Mexican

1:52:45

Government it appears to show a tree with a branch framing what looks like a Halo of hair but Amo says it's a picture

1:52:52

of an alux a mischievous Woodland Spirit an elf from Mayan folklore maybe amlo

1:52:58

feels a kinship with the mythical Mayan elf who was known to Dart in and out of view and play tricks on humans only to

1:53:05

leave them duped again and again interesting because a few years ago amlo promised to bring down crime and lift

1:53:11

the economy and alas the people feel duped again this by the way is not the first mythical creature that amlo has

1:53:18

touted he was recently quot calling Cuban dictator Miguel Diaz Canal the leader of a profoundly Humane government

1:53:25

despite Cuba not having had a free election in 64 years but back to the elux the elf it's the biggest social

1:53:32

media hit since residential Mobile Alabama swore they spotted a leprechaun up in a tree they did not get a good

1:53:39

photo of the Irish Legend but the description prompted this drawing which itself is Legend finally you'll excuse

1:53:46

the Mexican media for not poking more fun at amlo and his elf tweet Mexico is

1:53:52

the most dangerous country on the planet for journalists Tucker It's just such a

1:53:57

great story everything about that was amazing and we're grateful for you trace Galer thank you

1:54:03

bet here's a sad story when he was 17 years old a man called James tubs sexually assaulted a 10-year-old girl it

1:54:09

wasn't a close call he sexually assaulted her in the bathroom of a restaurant so under policies enacted by

1:54:15

Los Angeles's Soros back da George gasone tubs received just 2 years in juvenile detention so getting stuck

1:54:23

in a cage with a bunch of other dudes is no fun no one likes it so tubs figured a way to get out he decided he's a woman

1:54:29

and that meant he had access to women in jail as you'd expect on a recorded jail

1:54:34

house phone call tubs praised gon's policies listen don't worry about it

1:54:40

it's a strike but they're going to plead I'm gonna plead out to I'm plead guilty they're going to S me on probation and

1:54:45

it's going to be dropped it's going to be done done I won't have to register once or nothing an offender you don't have to register I won't have to do none

1:54:52

of that so what are they going to do to you that nothing and the call gets worse actually

1:54:59

so disturbing we're not going to play it but tubs goes on to make shocking comments about his 10-year-old

1:55:04

molestation victim but George cascone is not mad at him no he's mad at one of his

1:55:10

own prosecutors for misgendering the child muster correctly identifying tubs

1:55:16

as a man that prosecutor Shaya isak enough to join us tonight and we are grateful for that Santa thank you so

1:55:22

much for coming on are we misstating any part of the story you were suspended for using correct pronouns about a man who

1:55:29

pled to child molestation correct so I was suspended

1:55:35

because I did not use the preferred pronoun of a child molester when

1:55:41

notifying the administration that I had evidence that James tubs was

1:55:47

perpetrating a fraud in the court playing the D DA's office and perpetrating a fraud in our justice

1:55:53

system so by notifying everybody that they're being played I was punished because I did not use you know I hurt a

1:56:01

child molester feelings by not using the correct pronoun I'm it's just incredible to me that you're coming on the show to

1:56:08

say this out loud why are you doing this this cannot help your career to put it mildly um no but how could I not I'm

1:56:16

obligated to I have kids um I know how innocent kids be and the fact that um I

1:56:22

can't stand by while the misguided policies of a progressive prosecutor like George gascon are putting child

1:56:29

molesters in juvenile facilities which is going to create more victims and

1:56:34

hiding the fact from the court so that the court is sentencing juvenil to these

1:56:40

facilities with known child molesters who are adults James tubs was 26 years

1:56:45

old and came from prison to the juvenile facility so wasn't like this is a

1:56:51

juvenile and was convicted as a juvenile he was 26 years old and you're putting

1:56:57

him in a juvenile facility I Can't Stand By and subject children to the risk of being harmed it's a public safety risk

1:57:03

and an extreme Injustice I I just find it amazing that you're willing to say that out loud and

1:57:09

of course you would know because you were there and we're truly grateful uh for your bravery Shay Santa thank you

1:57:15

very much for telling us that horrifying story thank you thank

1:57:20

you so there's some debate online about whether there actually are more environmental disasters more accidents

1:57:28

with critical infrastructure or whether we're just noticing them well we'll let you judge fires have broken out at three

1:57:35

separate oil facilities all owned by the same company in a single day when the US

1:57:41

government has been caught committing the biggest Act of environmental terrorism in history and blowing up the

1:57:48

northstream pipeline Maybe they're connected maybe not we're going to tell you what's happening cuz you should know we'll be right

1:57:55

back a lot of destructive coincidences have befallen critical infrastructure North America lately have you noticed

1:58:01

here's the latest example fires have just erupted at three separate oil facilities belonging to the same company

1:58:08

the Mexican state-owned oil giant PMX in one day one of these facilities is located in a place called Deer Park

1:58:14

Texas also on Thursday two more PMX facilities went up in flames in verac Cruz Mexico at least two people died

1:58:20

what caused these fires we don't know but whatever's going on is clearly alarming something you would attract

1:58:25

some attention from the B Administration but no no one cares and that may be why a

1:58:32

waste disposal facility in De Deer Park Texas just received more than 2 million gallons of poisoned water from the Ohio

1:58:38

train derailment local officials say were're not informed of this in advance and why would they be because they're not

1:58:44

Ukrainian so ESG stands for an environmental social and governance it's massively popular on Wall Street the

1:58:51

idea is to use investment pressure to force countries to adopt a neoliberal agenda and those principles destroy

1:58:57

countries like Sri Lanka which was pushed to abandoned chemical fertilizer and people people St starved so how does

1:59:03

the average investor get out of ESG well Omid Malik has created a way he's chairman and CEO of colum bear

1:59:10

acquisition Corp he joins us tonight Omid thanks so much for coming on if you're the average person and you don't

1:59:16

want your money to go to destructive schemes that anti-human what option do

1:59:21

you have well we all know the problem that Americans are sick and tired of buying

1:59:27

from woke corporations that hate them but the problem has been how do you set up an actual Patriot economy uh if we

1:59:34

can't find each other well today I'm proud to tell you that we have a solution and that is that Columbia the

1:59:39

company just mentioned uh that's a public company that I run that trades on a New York Stock Exchange is taking a

1:59:45

digital Marketplace called Public Square public you need an exchange to be the

1:59:50

foundation of this economy which will connect like-minded buyers and sellers in this Patriot economy so what I'm

1:59:56

proposing today is that we create the foundation of the economy that we all want and that you and I have described

2:00:02

the most exciting part of this though is how huge this Market actually is and that's not something that's really

2:00:08

talked about for the last 20 years our corporations have gone to places like India and China to try to find demand

2:00:15

what if I were to tell you there's a market with over a 100 million people that represents the third largest

2:00:21

economy by GDP and it's right under our noses put differently the last Emerging

2:00:27

Market in the world is red America and it is being actively ignored and

2:00:33

alienated by our own corporations so for the average person

2:00:38

and I'm pronouncing the name correctly now columb investment the average person can get involved in this directly

2:00:46

without having to send money to some big investment firm that hates them and their

2:00:52

values yeah and that's the beauty of why Public Square the digital app that we're taking public wanted to do this it's

2:00:58

very important to them that they become a public company that just rank and file folks can go and buy and support the

2:01:04

mission and that's what we're most excited about is the democratization of capital markets and we need to do this

2:01:11

Tucker because as we've discussed in the past we are slouching towards social credit scores in this country and so we

2:01:17

need to create this economy to ol at ourselves from that because the battlefield for Liberty will be around

2:01:22

Commerce not just politics that's exactly right you can have all the opinions you want but if all the money is on the other side you're going to

2:01:29

obey in the end I think that's I think that's absolutely right I mean Mal I hope you will come back thank you for

2:01:34

doing this and great to see you my pleasure Tucker thank you we've got more news welcome to Tucker Carlson tonight

2:01:41

the war in Ukraine began a year ago today on February 24th 2022 when the

2:01:46

Russian military rolled across the eastern border of that country but in many ways the Russian invasion of

2:01:52

Ukraine was the end point of a much longer story The propaganda campaign

2:01:57

designed to convince Americans to take sides in this conflict a conflict that has nothing strictly speaking to do with

2:02:03

them or with America that effort began many years earlier we' Peg it to July

2:02:08

22nd 2016 that's the day that Wikileaks published thousands of emails from the

2:02:14

servers of the Democratic National Committee in Washington those emails Pro that party officials had rigged the

2:02:20

Democratic process the primary process in favor of Hillary Clinton and against the Insurgent populace candidate that

2:02:27

year Bernie Sanders of Vermont within days the chair of the DNC Debbie wman

2:02:32

Schulz resigned in disgrace the wick leag Scandal broke on the same day that Hillary Clinton chose her running mate

2:02:38

Senator Tim Kaine and it overshadowed the nominating convention that followed but more significantly the wikileak

2:02:45

Scandal threatened to split the Democratic party into pieces more than 13 million Bernie Sanders voters many of

2:02:52

the young people learned that the process they had always believed in was in fact a sham they had been cheated

2:02:58

Democratic leaders had to act quickly in the face of this to deflect blame from themselves onto someone else the dnc's

2:03:05

servers they claimed had been hacked by the Russian military the goal was to hurt Hillary Clinton whom the Russians

2:03:11

feared for her strength and wisdom and to help Donald Trump whom they controlled Russia hacked the servers in

2:03:18

order to hack the election that was their story The Washington Post ran with it the first day as if it were true but

2:03:24

there was never any evidence that it was true almost 7 years later there is still no evidence the dnc's story about its

2:03:32

servers is a lie but as a political strategy that lie worked flawlessly

2:03:37

Russia made the perfect villain it was a white Christian country with a traditional social structure it was

2:03:42

everything the Democratic party already opposed the foreign policy apparatus in Washington was happy to hate Russia

2:03:48

again after 40 Years of Cold War hating Russia was muscle memory so soon the

2:03:54

leaders of both parties in Washington signed on to the Russia collusion hoax it had the twin benefits of paralyzing

2:04:00

the Trump Administration which it did and justifying the expansion of the National Security State as the years

2:04:07

passed and the rhetoric intensified hysteria set in after a while anybody with a heterodox opinion from

2:04:13

right-wingers to avowed socialists could be accused of working secretly for Vladimir Putin many were accused and

2:04:20

some were destroyed by it it was a textbook Witch Hunt far more effective than McCarthyism and unlike McCarthyism

2:04:27

it never ended Russia remained America's greatest enemy even as China emerged as

2:04:33

America's greatest threat over time the lie that Democrats told to hide their crimes in the 2016 primaries came to

2:04:41

dominate America's foreign policy and then to imperil America itself for

2:04:47

Generations Statesmen and diplomats work to prevent other great powers from aligning as a block against the US the

2:04:53

idea was pretty straightforward you might be able to beat one strong country but if a couple of strong countries ever

2:04:58

got together you would lose this is why Richard Nixon went to China to make sure the Chinese government didn't align with

2:05:05

bnv with the Russians Donald Trump understood this very clearly Russia will never be our

2:05:10

closest Ally he said but if Russia ever becomes China's Ally we're in deep trouble the combination of Natural

2:05:18

Resources military and economic power and sheer population would make the Russian Chinese Alliance the most

2:05:23

powerful force in the world the United States would soon be dethroned we'd be taking orders As Trump put it there is

2:05:31

no reason to make Russia our enemy and there are many reasons not to it was a sound case but official Washington

2:05:38

ignored him their response shouted in unison shut up Putin stooge and then they set about trying to provoke a war

2:05:44

with Russia now they have succeeded but the war we are fighting in Ukraine is not against Russia alone but also

2:05:50

against Russia's newest Ally the People's Republic of China what Donald Trump predicted has happened and in the

2:05:57

worst way if the war in Ukraine continues we will lose No Matter How It Ends the world order is being reshuffled

2:06:05

as we watch and by the time it's over the US will no longer be at the top of the deck that is very obvious to the

2:06:11

rest of the world but what's fascinating is how few Americans seem to understand what's happening or its consequences but

2:06:17

how would they know no one in American politics or media will tell them the truth since the first

2:06:23

hours after the invasion Americans have been fed a steady diet of increasingly absurd lies about Ukraine Google and

2:06:30

Facebook have joined with the Biden Administration to censor any factual information that contradicts the

2:06:35

official storyline it's dystopian Joe Biden's first remarks about the war gave

2:06:41

no hint that we would be sending Advanced Weapons Systems and American Military advisers to Ukraine then

2:06:47

supporting the entire Ukrainian govern government and its pension system with hundreds of billions of us tax dollars

2:06:53

no Joe Biden mentioned only sanctions which are free sanctions he suggested would be enough here is Joe Biden a year

2:07:00

ago today the Russian military has begun a brutal assault on the people of Ukraine without provocation without

2:07:08

justification without necessity this aggression cannot go unanswered if it

2:07:14

did the consequences for America would be much worse America stands up to

2:07:20

bullies We Stand Up For Freedom Putin is the aggressor Putin chose this war and now

2:07:28

he in his country will bear the consequences today I'm authorizing additional strong

2:07:34

sanctions strong sanctions that'll do it now the goal at that point a year ago today you may remember this was to push

2:07:41

Russian forces back into their own country to reverse the invasion and that seemed reasonable to most people it did

2:07:48

not seem like the beginning of a third world war oh but it was exactly that and

2:07:53

by December Lindsey Graham was confident enough to say so out loud here he is how

2:07:58

does this war end when Russia breaks and they take Putin out anything short of that the war is going to continue to ask

2:08:05

the ukrainians to give Russia part of their country after all this death and destruction is not going to happen to

2:08:12

Signal a ceased fire Russia will take the opportunity to rearm and come at them again so we're in it to win it and

2:08:19

the only way you're going to win it is to break the Russian military and have somebody in Russia take Putin

2:08:25

out so we're going to says Lindsey Graham confidently continue pouring billions into Ukraine until they quote

2:08:32

take Putin out does Putin know this well we have no idea we're not allowed to see

2:08:38

Russian media in this country that's too much information for Americans to handle but if Putin does know that we plan to

2:08:45

kill him wouldn't he fight back with nuclear weapons why wouldn't he fight back with nuclear weapons no one in the

2:08:51

United States seems to be allowed to wonder that much less have a conversation about it out loud instead

2:08:56

we're treated to more lectures about democracy Ukraine is a democracy we're told that's why we're on the side of

2:09:02

Ukraine the problem is that is a lie Ukraine is not a democracy Ukraine is a corrupt one- party State Ukraine has

2:09:09

none of the freedoms that Define democratic governance freedom of speech freedom of the press freedom of assembly

2:09:15

freedom of religion Ukraine is the least free place in all of Europe and probably

2:09:20

for that reason it is Joe Biden's favorite place so for those who understand what is actually happening

2:09:26

and what Ukraine is actually like it is very frustrating to watch Biden say this again and again it is guling to be

2:09:33

lectured about democracy by a man who took power in an election so sketchy that many Americans don't believe it was

2:09:39

even real Joe Biden has never had the majority of American support for a

2:09:45

single day of the Ukraine war in fact Joe Biden is far less popular in the United States than Vladimir Putin is in

2:09:52

Russia that is not an endorsement of Putin it's just true and it says everything about Joe Biden's tenuous

2:09:59

legitimacy democracy please we're adults stop lying to us so what happens next in

2:10:06

this war well according to our elderly treasury secretary Janet Yellen the war in Ukraine will go on forever and so

2:10:13

will our support for zalinski let me make clear the United States um and the Allies uh our support

2:10:23

for Ukraine will be lasting and is

2:10:28

unconditional unconditional support for Ukraine unconditional support for a

2:10:34

nation most Americans know nothing about and couldn't find on a map unconditional

2:10:39

support that's a profound statement outside of your immediate family how many people would you pledge

2:10:46

unconditional support to how many countries would you pledge unconditional

2:10:51

support to this is insane when you think about it but the people in charge of

2:10:56

This Disaster aren't thinking the way that most Americans do the Atlantic magazine commemorated the anniversary of

2:11:02

the war by commissioning a piece today by Tom Nichols Nichols is a thoroughly silly foreign policy establishment

2:11:07

parasite who apparently is taken seriously by other Nells and dumb people in Washington but the piece is

2:11:13

fascinating in it he inadvertently reveals the point of this war is in the clearest possible terms

2:11:20

quote now we are faced with the long grind of defeating moscow's armies and

2:11:25

eventually rebuilding a better world oh defeating moscow's armies and

2:11:32

building a better world perfect thank you Tom Nichol adding those items to this week's to-do list unspecified in

2:11:38

the piece is exactly how we plan to do this how we plan to defeat Russia and its Ally China and then build Utopia the

2:11:45

piece is notably light onto tals now you'd feel a little better hearing all this if Tom Nichols and others like him

2:11:50

in Washington had a track record that suggested they could do any of this a track record of competence and success

2:11:57

they don't Nichols himself seems to spend most of his life arguing with other people on Twitter he's never

2:12:02

achieved anything at all that we're aware of but then virtually none of them have achieved anything Biden's Chief

2:12:09

Ukraine strategist Toria nulan you would not hire her to plan spring break she couldn't do it she doesn't have the

2:12:15

skills now these very same people these demonstrably incompetent people say they

2:12:21

plan to rebuild a better world all right that seems ambitious how

2:12:27

about starting with Baltimore before moving on to Total Global transformation shouldn't we fix the biggest city in

2:12:32

Maryland First under the leadership of people like Tom Nichols and Tor newand

2:12:38

neoliberal Geniuses with grand plans Baltimore has devolved into third world

2:12:43

chaos but then so has Iraq and so has Libya and so has every other place these people people have decided to quote

2:12:50

rebuild it should spur a moment of silence and self-reflection in the US state department that the moment Western

2:12:56

diplomats and NOS left the country Afghanistan got safer there are far

2:13:02

fewer killings in kabell now than there were 18 months ago pedestrians at Cabell can walk to dinner at night without

2:13:08

being murdered now that fact doesn't tell the whole story of Afghanistan of course but we shouldn't ignore that fact

2:13:15

it means something if you spend B ions trying to make a place better and it gets worse you have an obligation to

2:13:22

think about why maybe you're doing it wrong maybe you're not as powerful and clever as you thought you were maybe

2:13:29

there's a problem with your formula but none of this ever occurs to people like Tom Nichols and Toran nulan

2:13:35

and for that matter Joe Biden the more discredited they are the more self-confident they become they see

2:13:43

every failure as evidence that their talents are more desperately needed than ever what is this well it's called

2:13:50

hubris hubris is the delusion that causes people to mistake themselves for God they imagine they have power and

2:13:57

wisdom and foresight they don't actually possess that no human does huis is a

2:14:03

species of mental illness these people are unwell they're crazy and there's nothing more dangerous than that huus

2:14:10

has caused more suffering than polio it's caused more deaths than small poox and apparently we're in the middle of

2:14:17

another epidemic of it Douglas McGregor is a retired army colonel who knows a lot about hubus he joins us tonight so

2:14:23

not to single out Tom Nichols who's one among many people Afflicted with this but to say that our goal is to crush

2:14:32

Putin's armies the armies the over Million Man armies of Russia and then rebuild a better world does that strike

2:14:37

you as a little ambitious well not really if you consider the Washington strategy right

2:14:43

now led by President Biden why fight one war when you can fight two at the same

2:14:48

time against two of the most powerful nations in the world everything that the Biden Administration has touched thus

2:14:55

far is a disaster the world is dollariz Europe's economies are are not

2:15:01

growing Russia's economy is growing and growing faster than Europe's economies

2:15:06

we have a fire sale on dollars and us treasuries last year Russia's budget

2:15:12

deficit as a percentage of GDP was 2.3% America's budget deficit is a

2:15:17

percentage of GDP was 5.4% the Ukrainian armed forces are facing a Manpower crisis they're hurting

2:15:26

boys old men and women into uniform the Ukrainian armed forces are strained to

2:15:31

the Limit without NATO military Manpower Manning and conducting operations the

2:15:37

Ukrainian armed forces would fall apart then you look at NATO NATO is deeply

2:15:42

divided turkey is ready to leave the alliance they're aligning more and more with each passing week with Central Asia

2:15:49

with China with Russia and other countries Germany is desperate for the resources to keep its scientific

2:15:56

industrial base functioning Germany is not going to stay in NATO if this war

2:16:01

continues indefinitely and then finally you have Russia itself our greatest

2:16:07

achievement has been to enable Putin to build a Russian military establishment

2:16:12

that is larger and more powerful today than we have seen in 30 years and qualitatively it is superior to anything

2:16:19

the Soviets fielded in the 1980s and as you and I speak the Russians are

2:16:25

assembling the largest stockpile of artillery ammunition Rockets missiles and drones frankly since the second

2:16:32

world war and they're about to hurl all of it at Ukraine and finish the job they began a year

2:16:39

ago I grieve when I hear nice people in this country there are so many and I often hear it root for zilinsky like

2:16:45

he's a sports hero they have no idea a what's at stake here in the massive Global realignment underway because they

2:16:51

would have no way of knowing U because they don't watch you and the very few others who tell the truth I appreciate your coming on tonight dou thank

2:16:59

you the B Administration has spent billions and billions well apparently hundreds of billions if you total it all

2:17:05

up in Ukraine but it has done nothing for the people of East Palestine Ohio

2:17:11

really does seem like a metaphor Aaron Brockovich joins us next on that and much more on the special edition of

2:17:18

Tucker Carlson sun on the year anniversary of the war in

2:17:24

Ukraine East Palestina and Ohio Ohio and Ukraine are not technically related in

2:17:31

any way but you still can't help but notice the difference between how they are treated by the Biden Administration

2:17:38

so the administration just announced another two billion dollars in funding

2:17:43

for Ukraine we sent them over 100 million already but no money for the people and East Palestine who as you

2:17:49

well know were exposed through no fault of their own to toxic chemicals Aaron brovich is in East Palestine tonight and

2:17:56

we thought it would be interesting to talk to her and thank you so much for coming on do you know I mean can you see

2:18:02

the disparity in oh of course can you see that the the disparity between the concern for the people of Ukraine know

2:18:09

which I'm not discounting as as real with the concern for the people in

2:18:14

East Palestine there seems to be a huge difference

2:18:20

well it's certainly concerning to the people of East Palestine I mean you know we're pushing a month now and they still

2:18:25

don't have any answers it's very obvious something's really gone wrong out here I've been out here down on the ground

2:18:31

and they're really frustrated why they don't feel that their agencies or their Administration cares about what's

2:18:38

happened to the community so it is very apparent they are are concerned and not

2:18:43

being seen or heard so that you you make such an interesting point and I don't know the answer to this but you've been

2:18:49

around this kind of thing before you think that there's something specific that they're not being told that's

2:18:54

that's your sense yeah there is and I mean it's like

2:19:00

oh my gosh come on we're out here I what 44,000 fish are dead we've seen them

2:19:06

we've seen them out here today ating The Creeks they're removing stuff the the

2:19:11

wellheads are locked what's up look you don't have to go any further in my opinion than a 100-year study that we

2:19:17

all know the miners did for us it's called the canary and the M shaft send the canary down there it dies might not

2:19:23

be good for humans you have dead fish might not be good for humans you have dead animals might not be good for

2:19:28

humans you've sent a horrible mixed message to this community drink the water don't drink the water safe not

2:19:34

safe it's it's horribly confusing and extremely frustrating to them and

2:19:40

something actually has gone wrong here and there's information that has yet to

2:19:45

come forward and the story will continue to unfold I it's so nicely put and I just

2:19:50

want to pick up on something you said the well heads have been locked what did you

2:19:56

mean so so in the schools uh so the children can't drink The Fountains and

2:20:02

then on private Wheels around here they've got locks on them so they

2:20:07

obviously come on if there's no problem you don't need to lock a a drinking

2:20:13

fountain you don't need to be error rating the system and you you can explained away all day long to me that

2:20:19

nothing's wrong but I I I see what's going on here yeah I think it's better to make decis

2:20:25

me it's better to make judgments on the evidence than on the words I agree with that thank you Aon brovich good to see

2:20:31

you tonight thank you Tucker it's nice to see you thank you Senator Josh Holly

2:20:37

represents Missouri in the United States Senate he's been watching all of this Senator thanks so much for coming on you

2:20:43

just can't have you you hate to connect unrelated stories but you just can't

2:20:49

help but notice the difference in the level of concern for Ukraine versus

2:20:55

Ohio yeah and I don't think they're unrelated at all Tucker I mean the truth is that Joe Biden and let's face it

2:21:00

Congressional Republicans have spent over 100 billion dollar in counting on

2:21:05

the Ukraine war and meanwhile the folks in East Palestine have poison in the water poison in the air it's clear that

2:21:12

our infrastructure in this country is crumbling and what is this Administration doing about it frankly

2:21:17

what is Congress doing about it not a whole heck of a lot and I think that that's a STK contrast and I would just

2:21:23

say to Republicans listen you can either be the party of Ukraine and the globalists or you can be the party of

2:21:29

East Palestine and the working people of this country but it's time to say to the Europeans no more welfare for Europeans

2:21:35

let the Europeans take the lead on Europe it is time to put the working people of this country first to make

2:21:41

those folks strong again and to make this country strong again if you keep ignoring people and short circuiting the

2:21:48

Democratic process they get increasingly radical everyone's like Trump's so radical Trump's pretty moderate actually

2:21:54

are you concerned that you could see actual radicalism in American politics just born of frustration why wouldn't

2:22:00

that happen well you just look at at what the the mayor of East Palestine for example

2:22:05

said Tucker you listen to the folks on the ground there and listen I hear the same thing all over Missouri my state is

2:22:10

not so different from Ohio it's not different at all people say that the folks in Washington DC care more about

2:22:15

the borders of Ukraine than they care about the borders of our own country they care more about what's going on over there than the drugs that are

2:22:21

flooding into our schools and our communities in Missouri and every other state across this country they care more

2:22:28

about other Count's roads and bridges than they do about our own so yeah I'm concerned I'm concerned about the fact

2:22:34

that folks don't feel they're represented they don't feel they're spoken for and the truth is much of the time they're not and that's why I would

2:22:40

just say to my fellow Republicans it's time for us to stand up and speak for the working people of this country and

2:22:46

put them first amen because people will get too frustrated and that's no one wants to

2:22:51

live in a really volatile country uh Senator Josh Holly Missouri thanks so much for coming on tonight thank

2:22:58

you so what's interesting is how the worst most destructive people in the

2:23:03

world are almost always painted as the heroes and vice versa so zalinsky who is clearly demonstrably a destroyer of

2:23:10

things not a builder of things a destroyer has taken over \$100 million in your tax money and now he's telling you

2:23:18

how dare you question that and if you do question or future payments to him and his wife it's dangerous

2:23:25

watch I would like to thank all of the American people that are supporting

2:23:30

Ukraine the Congress the president the

2:23:36

TV uh channels the journalists little more on that this

2:23:42

special anniversary edition of Tucker Carlson tonight the one year anniversary of the war in Ukraine we'll be right

2:23:50

back risking nuclear war to defend what we're calling democracy in Ukraine it might be worth checking in with

2:23:56

Americans since in a democracy their opinion should matter so according to the polls Americans actual Americans

2:24:03

think we should stop giving money to Ukraine in a new AP Poll for example just 37% of Americans favor sending

2:24:11

taxpayer dollars to the corrupt and repressive government of Ukraine now the

2:24:17

the man who runs that corrupt and repressive government zilinsky was just asked about this watch his

2:24:23

response if they do not support Ukraine they will lose NATO they will

2:24:31

lose um The Cloud of the United States they will lose the leadership position

2:24:38

that they are joining in the world uh that they joined for a very fair reason

2:24:43

and they will lose the support of the country with 40 millions of population

2:24:49

with millions of children are American children's any different than

2:24:54

ours don't Americans enjoy the the same things as we do I don't think we're that

2:25:01

different if it happen so that Ukraine due to various opinions and weakening

2:25:08

depleting of assistance loses Russia is going to end

2:25:18

Baltic states NATO member states and then the us will have to send their sons

2:25:25

and daughters exactly the same way as we are sending their sons and daughters to

2:25:30

war and they will have to fight because it's a NATO that we're talking about and

2:25:35

they will be dying they're selling that man as a hero and he has for a full year done his best

2:25:43

to get your sons to Ukraine to die in beh half of his country he's not a hero he's an anti-hero he's a destroyer

2:25:51

Lieutenant Colonel Daniel Davis is the defense priority senior fellow he joins us tonight I'm just amazed that the US

2:25:57

media in conjunction with this Administration has been able to sell this guy who clearly has contempt for

2:26:03

the lives of American citizens as George Washington how have they been able to do that yeah I it's it's been concerning me

2:26:11

for quite a long time Tucker I'll tell you but this this clip you just played really it's kind of as a whole new level

2:26:17

of basically claiming that it's It's Our obligation to go and fight on his behalf and and it's not look the the idea that

2:26:25

he's fighting for NATO and for Europe and to prevent America is nonsense I'm sorry we have to be honest about this

2:26:32

but you can tell after a full year of War Russia has eak out about 15% of One

2:26:37

Nation on their border they pose absolutely no threat to Nato or to the

2:26:42

United States national security because they don't even have the capacity so this is issue is between Russia and

2:26:48

Ukraine and that's what needs to be resolved but the idea that this could expand to Nato and that we would have to

2:26:53

go fight that would only be a choice that we make completely outside of any need for our

2:27:00

country why is Noone stood up really every single day for the last year to say you know you may feel for the

2:27:05

ukrainians I certainly do we owe no historic debt to Ukraine we have no historic connection to Ukraine we have no treaty with Ukraine we have nothing

2:27:11

to do with Ukraine any more than we do with East timour or Congo like this is insane why no one say anything about it

2:27:18

right yeah and and I and I think that I I suspect that that's starting to change because look we have absolutely been

2:27:24

over backwards to help Ukraine and given a staggering amount of our own national security equipment and yet it's more and

2:27:31

more as demanded and now they I think he actually wants us to go and fight for him which I can understand from his

2:27:36

perspective but I cannot understand from our perspective and it is time for us to say we need to focus on American

2:27:43

National Security and on American needs and that does not mean getting close to to potentially striking a war between

2:27:48

Russia and the United States nicely put Lieutenant Colonel Daniel Davis for us tonight thank you

2:27:54

always my pleasure so the Biden Administration has effectively ignored East Palestine Ohio and and really all

2:28:01

of Ohio which has been rotting for years parts of it and went and said to Kiev this week the aid sirens played for

2:28:07

maximum dramatic effect the media was deeply impressed by the whole warlike display he's

2:28:13

Churchill to find a day of this kind of presidential bravery in a war zone

2:28:19

you've got to go all the way back to 1864 July when Abraham Lincoln as

2:28:25

president went to see Confederate soldiers who were firing on Washington DC I think it's historic uh it's like

2:28:32

when JFK went to Berlin in 1963 when Ronald Reagan went to West Berlin in 1987 and said Mr Gorbachev

2:28:40

tear tear down this wall sininsky has been called The Church of Our Generation and Biden going there today I think it's

2:28:47

going to be a a moment for the history books what an inspiring day what an inspiring few days a Drew immediate

2:28:55

parallels uh to JFK in Berlin uh Reagan at the Brandenburg gate saying Mr

2:29:02

gorbachov tear down this wall of course the danger was far greater for Joe Biden

2:29:07

this was just about as good as it gets the dishonesty and the recklessness

2:29:13

the pure stupidity and the aggression really boggles the mind Glenn Greenwald is the host of the

2:29:18

Fantastic show system update which airs every day on Rumble we're happy to have him join us Glenn thanks so much for

2:29:24

coming you feel like maybe we've passed a threshold in propaganda where there's kind of no coming back if Doug Brinkley

2:29:30

can say something like that that's just so obviously untrue on every level like where does that leave

2:29:36

us I think it's the key is to actually acknowledge how potent War propaganda is

2:29:41

if you look at the opinion of the American people which I know nobody cares about and you ask them should the United States be the world's

2:29:47

policeman overwhelmingly 80% will still say no if you ask them do you think the United States is involving itself in too

2:29:54

many wars overwhelmingly Americans will say yes and yet every time we're presented with a new war they're able to

2:30:00

Rally the public to support it including a country that most Americans have never given any thought to for good reason

2:30:07

before which is Ukraine that has no vital interest to the United States and now we're there for a year pouring more

2:30:12

and more money and more and more Weaponry into it even though it has nothing to do with the of the American people except a tiny sliver of Elites

2:30:19

who work for rathon in the CIA and the reason is is because they depict something as Bal and Theatrical and

2:30:25

contrived as Biden's trip to Kiev for 5 hours as some sort of world historic

2:30:31

event that everyone in reality will be forgetting about by next Tuesday and it's constantly designed to play at the

2:30:37

heartstrings and the decent impulses of the American people to support things that are just not in their interest are

2:30:44

you worried big picture that Americans will become so frustrated at being ignored by their leaders really mocked

2:30:51

by their leaders that they'll get radical in a way that's dangerous I think you're seeing that

2:30:57

around the world the reason why people are turning to all kinds of anti-establishment leaders or

2:31:03

anti-establishment proposals like brexit where the United Kingdom just removed itself from the EU or turning to very

2:31:10

unconventional leaders like Trump or bonaro and Brazil and the like is because whoever promises to burn down

2:31:15

the establishment the Democratic and the Republican Party establishment or the Western military establishment that

2:31:21

people know are not on their side the public will go to them regardless of who they are that is how much the hatred has

2:31:28

compiled and assembled for these institutions and I have to say it's well deserved so yes you can have

2:31:34

negative outcomes but these institutions have made their own bed and now they're lying in it that's right but I mean

2:31:40

bolsonaro and Trump let's be honest propaganda are moderate guys like they both believed in the system but you

2:31:46

could get people who truly want to burn it down and they would have an audience because people are so justifiably

2:31:54

infuriated yeah I mean the the contrast between what is happening in Ohio and what is happening in Ukraine that

2:32:00

everybody ignores these people in Ohio because as we know those are the people in our country who do not count and they

2:32:06

all know it and if you get to the point where tens of millions of people start to realize that the political class and

2:32:12

their political leaders in both parties do not care about them at all they're will eventually lead to as you say

2:32:19

something far more radical than the supposedly radical leaders we've already had and that can be dangerous but it can

2:32:24

also be healthy and whether but but when you start trifling with that stuff the results are really unpredictable but I

2:32:30

want to say again that the fault lies with this establishment that is just growing increasingly arrogant and

2:32:36

insular that every word that you just uttered is true and I think very wise and people should pay attention Glen

2:32:42

Greenwall thank you so much great to see you thank you Tucker so the Biden Administration committed

2:32:48

the single largest most profound Act of industrial terrorism of sabotage in

2:32:54

history they blew up the nordstream pipeline which brought energy from Eastern Europe to Western Europe the

2:32:59

consequences of this will unfold over the generations we're going to bring you a update on that next on the special

2:33:06

edition of talk Carlson

2:33:11

night the northstream pipeline was one of the most important pieces of infrastructure in the world it supplied

2:33:17

energy to our NATO allies in Western Europe it helped Western Europe continue then it blew up who blew it up well the

2:33:24

bid Administration has had promised to blow it up and then it exploded and afterwards the White House and the media

2:33:30

claimed Russia did it Russia they blew up their own pipeline voria nulan at

2:33:36

the state department a truly sinister figure admits she's very pleased the pipeline is gone well none of this makes

2:33:41

any sense obviously the Biden Administration blew it up there's really no doubt about that but Democrats are

2:33:48

sticking with the lie that no Russia did it we thought we'd ask Jimmy dor who he thinks did it he's the host of the Jimmy

2:33:54

door show he joins us now Jimmy door thanks so much for coming on so it seems obvious the Biden people did it but in

2:34:00

doing it they not only causes massive environmental catastrophe but they also shafted their so-called NATO allies why

2:34:06

does no one seem to care about this well be uh you know Americans uh

2:34:14

are are well people forget what happened is Americans are the most propagandized people in the world right and they don't

2:34:21

even know what's happening with the nordstream pipeline what's they think that propaganda happens to other people

2:34:27

so this is 100% propaganda War and why doesn't Joe Biden want to investigate

2:34:32

this why doesn't Congress want to investigate this if they investigate it they'll know it it'll show that the United States didn't do it and Russia

2:34:38

did it so why don't they want to investigate it Sweden Denmark and Norway already did their own investigation of

2:34:45

this they won't release it why won't they release this investigations just like they don't want to investigate the

2:34:50

cause of the Corona virus outbreak they don't want to know the answers they don't want to investigate them because

2:34:56

they already know the answers you know America is turned into Chris Hedges has called the America a mafia State a tiny

2:35:02

Cal of people have control of our government and they're using it to do War for economic profit you know what

2:35:08

you'd the difference between our Mafia State now back then the mafia helped defeat the Nazis back then now we're

2:35:15

actually arming Nazis you know and isn't it just like America to ignore the Nazis

2:35:20

that are suffering here at home trying to buy eggs while we fund Nazis and other countries it's unbelievable what's

2:35:26

happening this is the this is really about World War III and why aren't they investigating it no now they won't even

2:35:32

ask them a question you know saur's art uh article came out detailing how they all blew up the nordstream pipeline and

2:35:38

the American Press won't even ask the people he named in that article a question about it they won't ask

2:35:43

Victoria Nan they won't ask Jess Sullivan they won't ask Anthony blinkin in fact those people won't even give a

2:35:48

statement about it you know who will talk about it Kirby the press secretary at the white house because I'm sure the

2:35:54

people who did the investigations have a pipeline right to uh Kirby but not to Anthony blinkin not to Sullivan not

2:36:01

Victoria neon by the way these are the same people who lied us into the Iraq War lied to us about Libya lied to us

2:36:07

about Syria dropped so many bombs in Syria they ran out of bombs they're doing the same thing America is the

2:36:13

world's terrorist we have 400 military bases surrounding China we provoke this by people don't know that the CIA got in

2:36:20

bed with the right-wing Nazis in Ukraine to overthrow the democratically elected government of Ukraine in 2014 we had a

2:36:27

we had a peace deal it was called the mince Accord and then they violated who violated it Ukraine kept sh shelling the

2:36:33

donbass which are the Russian speakers in the eastern part of the Ukraine and that's why Putin had to be provoked to

2:36:40

invade to protect those people nobody will tell you that everybody who talks about every other news station by the

2:36:46

way you're the only one doing this and I applaud you for letting people come out and tell the truth about what's actually

2:36:51

happening in Ukraine other stations when I watch what they do is they start the

2:36:56

history of Ukraine from Putin's invasion they never tell you that we overthrew their de democratically elected

2:37:02

government in 2014 they never tell you that they didn't stop shelling the people in the D they never abided by the

2:37:08

minist Accord they don't tell you that the former uh German Prime Minister said

2:37:14

that the the reason why they did the men the cords in the first place was so that Ukraine could build up their military to

2:37:20

get ready for this war that they're provoking so the American people are waking up there was a big okay uh anyway

2:37:26

I'll leave it there you sound like a Putin shill Jimmy

2:37:32

door you're this is the most propagandized country in the world makes me sad to agree with you but I but I do

2:37:37

Jimmy D thank you so much thank you so we're going to take a

2:37:42

quick break from the super depressing news from Ukraine on this one- year anniversary to show you part of a

2:37:48

fascinating conversation we just had with Mr Wonderful Kevin o that's

2:37:54

next Yi is one of the most successful certainly one of the most famous investors and businessmen around because

2:38:02

he's a TV star in addition to a businessman he's on Shark Tank and has been for 15 years he's Canadian he has a

2:38:11

really interesting analysis of the economy and the United States and basically he

2:38:17

believes certain places are becoming very different from other places and there will be no business in places like

2:38:23

New York and California before long we talked to him for a brand new episode of Tucker Carlson today here's part of

2:38:32

it Massachusetts is at war with entrepreneurship Elizabeth Warren will

2:38:39

punish you for Success she will make sure you pay super taxes if you're successful the regulatory environment

2:38:45

there is prohibitive for business New York even worse New Jersey forget about

2:38:52

it California is not in business you can't do business there and they're leaving like droves out of there so this

2:39:00

competition of states is beginning to occur I could put money anywhere

2:39:06

anywhere why because the pandemic changed our economy 40% of my staff at

2:39:12

every company regardless what city they're headquartered in Works remotely that's never going to change primarily

2:39:18

in accounting Logistics some marketing positions certainly sales you just don't need to be in the

2:39:25

office anymore I know there's guys trying to get everybody back but you can see through empty buildings in New York

2:39:30

City they're just not coming back they never going to they don't want to pay those taxes but the point is they're

2:39:35

never going to what happens to Sixth Avenue I think you turn it into condos I

2:39:42

mean what else you going to do but who's going to why would why would people live there if they don't have to go to the office I'm not I'm not cap rates in

2:39:49

other words the cost of real estate in in some of these places where it's highly now if you talk to real estate

2:39:55

developers in New York and I hear them every day they'll talk their book to the cows come home the truth is in commercial real estate they got issues

2:40:02

like real ones yeah because people don't want to put the Nexus of their business in a place where AOC is telling you I

2:40:10

hate you I'm going to litigate you I'm going to sue you I'm going to make sure that you can't create a job do you

2:40:15

remember the Amazon 10,000 jobs well she kicked out of there the guy that was running that

2:40:21

program I know personally he said wow was I ever glad we get out of that mess they hate us there they don't want our

2:40:28

jobs well which jobs are they going to get exactly like when you start chasing away entrepreneurial Capital so my whole

2:40:35

point is there are goto States and there's no go States and no

2:40:40

go States right now are New York New Jersey Massachusetts California you

2:40:46

cannot invest in those places they are no longer investable interesting interesting

2:40:52

perspective Kevin oi that conversation on Fox Nation right now so District Attorneys backed by George Soros are not

2:40:59

simply ignoring the law in making major American cities unlivable they're enforcing radical crazed gender ideology

2:41:06

the Soros back da in Los Angeles George gasone just suspended one of his prosecutors Shay Santa why because Santa

2:41:13

supposedly used the wrong pronoun to refer to a convicted child molester called Hannah tubs that prosecutor is

2:41:20

going to join us on Monday and we really look forward to that and a lot more by the way the show has learned there's a

2:41:26

brand new book being marketed to kids that celebrates our fake trans Admiral

2:41:32

Richard LaVine now called Rachel it's called she persisted because trans women are women anyway

2:41:39

order in the book dramatic reading have the best weekend
